MARTHA Paul Penfield 1971

MARTHA is a set of general-purpose programs for analyzing linear electrical networks, available to users with access to APL time-sharing systems. The programs analyze, as a function of frequency, most linear "transmission-type" networks,

with an input and an output.

This includes most filters, amplifiers, microwave networks, and feedback systems, even if such circuits are relatively complicated, with multiple feedback paths and branches. The programs cannot handle some complicated interconnections of components, and are not set up to analyze nonlinear or time varying networks. The topology of the network is described using "wiring operators." The elements available include lumped and distributed, active and passive, reciprocal and nonreciprocal elements. The possible output includes two-port parameters (impedance, admittance, hybrid, scattering, and ABCD matrices), as well as voltage gain, insertion gain, transducer gain, etc. These, their real or imaginary parts, or magnitude or phase, may be printed or plotted as functions of frequency or of each other. More than one network can be analyzed simultaneously.

MARTHA is not inherently better at one frequency range than another, except perhaps in its repertoire of elements and response functions. MARTHA includes, besides R, L, and C, sixteen controlled sources; operational amplifiers; mutual inductance; three transistor models and the possibility of easily creating others; ideal transformers; several composite pi and tee structures; and a few exotic elements such as gyrators. For high-frequency applications MARTHA has several microwave elements, including TEM transmission lines, waveguides, attenuators, and isolators.

The Free Flag of Cuba Lucy Petaway Holcombe Pickens 2002
"The wife of South Carolina secessionist governor Francis W. Pickens and known as the "Queen of the Confederacy,"

Lucy Holcombe Pickens (1832-1899) was during her lifetime one of the most famous women in the South. Indeed, she was the only woman pictured on Confederate currency. Rumor was that in her youth she published a novel under a pseudonym. Recently discovered as *The Free Flag of Cuba*; or, *The Martyrdom of Lopez: A Tale of the Liberating Expedition of 1851*, a romanticized account of the 1851 filibustering expedition to Cuba led by Narciso Lopez, it was published under the alias H. M. Hardimann in 1854. With this new edition, Orville Vernon Burton and Georganne B. Burton resurrect Holcombe's lost work and prove it to be a window on many pressing nineteenth-century issues, including patriotism, freedom, independence, imperialism, nationalism, race, the role of southern women, and slavery." "A not-so-subtle plea for U.S. support for Cuban independence.

from Spain, Holcombe's novel vindicates Lopez and his men, who were officially regarded as mercenaries, some of them captured and executed. The young author was determined to have an influence on the national debates of her time, and her book declared to the world that the Lopez campaign was noble and he and his men were martyred heroes." "Revealing the link between gender issues and filibustering, Holcombe's tale clearly reflects the values southern aristocratic women expected in men, even if preserving those values meant death and defeat - a harbinger of ardent support for the Confederacy by women like Lucy. Like the South's secession, the Lopez expedition was an abject failure, and the novel eerily presages Lost Cause mythology."--BOOK

Divorce Mediation John M. Haynes 1981 "Divorce mediation offers mental health professionals and lawyers an effective way to help couples dissolve their marriages, minimizing the frustration and animosity commonly associated with the adversarial process. The rapid growth of divorce mediation centers is evidence of the need for specially trained professionals who can continue working with clients once the decision to divorce is made. This handbook will enable clinical psychologists, counselors, clergy, and social workers to expand their practice into this important field. Lawyers also will find the book useful in relating to divorce clients and to mediators. The author presents a model for helping couples negotiate mutually beneficial

separation agreements while coping emotionally with divorce. He demonstrates how a mediator helps resolve key issues concerning the division of personal and real property, support, children, and plans for the future. He gives step-by-step guidelines for moving through the mediation process and illustrates this with nine case studies. Also included are a discussion of the special problems of children of divorcing couples, and appendixes containing a manual for clients and sample separation agreements." -- Jacket.

American Light Trucks and Utility Vehicles, 1967-1989 J.

"Kelly" Flory, Jr. 2020-01-15 The truck's role in American society changed dramatically from the 1960s through the 1980s, with the rise of off-roaders, the van craze of the 1970s and minivan revolution of the 1980s, the popularization of the SUV as family car and the diversification of the pickup truck into multiple forms and sizes. This comprehensive reference book follows the form of the author's popular volumes on American cars. For each year, it provides an industry overview and, for each manufacturer, an update on new models and other news, followed by a wealth of data: available powertrains, popular options, paint colors and more. Finally, each truck is detailed fully with specifications and measurements, prices, production figures, standard equipment and more.

academic, professional and general readers, Bush, city, cyberspace provides a snapshot of the state of Australian children's and adolescent literature in the early twenty-first century, and an insight into its history. In doing so, it promotes a sense of where Australian literature for young people may be going and captures a literary and critical mood with which readers in Australia and beyond will identify. The title of the work is intended to capture the fact that the field has changed dramatically in the century and a half that 'Australian children's literature' has existed, from the bush myths and heroism that inform the past and the present, through the recognition that the vast majority of authors and readers live in cities, to the third wave of 'cyberliterature' that incorporates multimedia, hypertext, weblinks and e-books - none of which lessens the enduring enthusiasm of

practitioners and readers for books. Bush, city, cyberspace is not meant to be an encyclopedic volume. Rather, well-known, recent and/or award-winning works have been emphasised, with the addition of others where these help to illuminate particular points. The book is similar in coverage and approach to Australian Children's Literature: An Exploration of Genre and Theme, written by the same three authors and published by the Centre for Information Studies in 1995. In the intervening period, much has changed in the field, notable examples including the blurring of the dividing line between 'quality' and 'popular' literature; the blending of genres; the rise of a truly indigenous literature; the demise, to a significant extent, of 'Outbackery' in fiction; the acceptance of multiculturalism as the norm; and the advent of the literature of cyberspace, with new methods, and the sheer
