An Index to Articles Published in The Etude Magazine, 1883-1957,

Part 1 Pamela Richardson Dennis 2011-01-01 As America's geography and societal demands expanded, the topics in The Etude magazine (first published in 1883) took on such important issues as women in music; immigration; transportation; Native American and African American composers and their music; World War I and II; public schools; new technologies (sound recordings, radio, and television); and modern music (jazz, gospel, blues, early 20th century composers) in addition to regular book reviews, teaching advice, interviews, biographies, and advertisements. Though a valued source particularly for private music teachers, with the de-emphasis on the professional elite and the decline in salon music, the magazine ceased publication in 1957. This Index to the articles in The Etude serves as a companion to E. Douglas Bomberger's 2004 publication on the music in The Etude. Published a little over fifty years after the final issue reached the public, this Index chronicles vocal and instrumental technique, composer biographies, position openings, department store orchestras, the design of a successful music studio, how to play an accordion, recital programs in music schools, and much more. The Index is a valuable tool for research, particularly in the music culture of American in the late nineteenth and early twentieth centuries. With titles of these articles available, the doors are now open for further research in the years to come. The Index is published in two parts and sold as a set for \$250.00.

The Ethnic Crucible Gajendra Verma 2012 Many schools in developed countries have children and adolescents from a variety of ethnic, linguistic, religious and cultural backgrounds. They relate to each other in various degrees of encounter that range from harmony to hostility. The issue of how a school can foster inter-ethnic relationships and challenge the manifestations of bad relationships cannot of course be divorced from tensions and inequalities in the wider society. This book focuses on ways in which schools might make a difference to the quality of such relationships within their walls. It has sought to do this by studying nine secondary schools in some depth: their organisation, structures and interactive processes: and the experiences, attitudes and behaviour of students and their teachers. The research on which the book is based has also yielded data on the influence of policy and procedure in schools on relationships.

Resilient and Responsible Smart Cities Hassan Abdalla 2022 This book aims to establish a community with attention to land use to achieve sustainable development and meet the needs of today's society. Urban planning depends on engineering, architectural, social and political pillars. It pursues this by proposing solutions, regulating environmental pollution and non-sustainable use of available resources. It showcases and even triggers further debate about connections between sustainable development, urban planning and technology in hopes of achieving sustainable development models that sustain urban expansion and shape cities that improve the overall quality of life. It views urban planning and development as vital fields that ensure the application of revolutionary approaches with new materials and processes incorporated in the most efficient manner.

Physical Examination and Health Assessment - E-Book Carolyn Jarvis 2011-05-03 With an easy-to-read approach and unmatched learning support, *Physical Examination & Health Assessment*, 6th Edition offers a clear, logical, and holistic approach to physical exam across the lifespan. Detailed illustrations, summary checklists, and new learning resources ensure that you learn all the skills you need to know. This gold standard in physical exam reflects what is going on in nursing today with coverage of emerging trends and new evidence-based content. It's easy to see why this text is, far and away, #1 in this market! This item is a stand-alone text. A clear, conversational writing style makes learning easier. A two-column format distinguishes normal findings from abnormal findings, and uses color, step-by-step photos to clarify examination techniques and expected findings. Over 1,000 full-color illustrations present anatomy and physiology, examination techniques, and abnormal findings. Developmental considerations help in caring for patients across the lifespan with age-specific assessment techniques for infants, children, adolescents, pregnant females, and older adults. Abnormal findings tables include over 300 pathology photos to help in recognizing, sorting, and describing abnormalities. Promoting a Healthy Lifestyle boxes enable patient teaching and health promotion while performing the health assessment. An emphasis on cultural competencies reflects today's care considerations for an increasingly diverse patient population. Documentation examples show how to record assessment findings in the patient's chart, using the SOAP format. Summary checklists provide a quick review of examination steps. Spanish-language translations on the inside back cover highlight important phrases for better communication during the physical examination. A companion Evolve website helps you review key content offering case studies with critical thinking questions, printable health promotion handouts, a head-to-toe examination video, heart and lung sounds, audio chapter summaries, and more. NEW evidence-based guidelines reflect a focus on conducting the most effective, qualitative exams. NEW Substance Use Assessment chapter addresses this increasingly critical aspect of holistic patient assessments. 100 new photos of step-by-step examination techniques include all-new exam panoramas for key systems. 100 new abnormal findings photos provide instant visual cues for findings that are unexpected or that require referral for follow-up care. Expanded chapter on assessment of the hospitalized adult provides a focused assessment of the patient in the hospital setting. New content on obesity provides current information on this growing health problem.

Rewriting the Nation Aleks Sierz 2011-01-16 In recent years British theatre has seen a renaissance in playwriting that has been accompanied by a proliferation of writing awards, new writing groups and a ceaseless quest for fresh, authentic voices that will ensure the vitality and relevance of theatre in the twenty-first century. *Rewriting the Nation* is a perfect companion to Britain's burgeoning theatre writing scene that will prove invaluable to anyone wanting a better appreciation of why British theatre - at its best - remains one of the most celebrated and vigorous throughout the world. The book opens by defining what is meant by 'new writing' and providing a study of the system in which it is produced. It considers the work of the leading 'new writing' theatres, such as the Royal Court, the Traverse, the Bush, the Hampstead and the National theatres, together with the London fringe and the work of touring companies. In the second part, Sierz provides a fascinating survey of the main preoccupations and issues that have characterised new plays in the first decade of the twenty-first century. It argues that while under New Labour economic, political and social change continued apace, generating anxiety and uncertainty in the population, theatre has been able to articulate not only those anxieties and uncertainties but also to offer powerful images of the nation. At a time when the idea of a national identity is hotly debated, British theatre has made its own contribution to the debate by offering highly individual and distinctive visions of who we are and what we might want to become. In examining the work of many of the acclaimed and emerging British playwrights the book serves to provide a narrative of contemporary British playwriting. Just as their work has at times reflected disturbing truths about our national identity, Sierz shows how British playwrights are deeply involved in the project of rewriting the nation.

Africa's Endangered Languages Jason Kandybowicz 2017 Relatively little is known about Africa's endangered languages. Unlike indigenous languages in Australia, North Asia, and the Americas, which are predominantly threatened by colonizers, African languages are threatened most immediately by other local languages. As a result, the threat of language extinction is perceived as lower in Africa than in other parts of the globe, and a disproportionate amount of research is devoted to the study of endangered African languages when compared to any other linguistically threatened region in the world. There are approximately 308 highly endangered languages spoken in Africa (roughly 12% of all African languages) and at least 201 extinct African languages. This volume hopes to illuminate and challenge this trend. Chapters offer both documentary and theoretical perspectives, emphasizing the symbiotic relationship between the two approaches and its implications for the preservation of endangered languages, both in the African context and more broadly. Documentary-oriented chapters deal with key issues in African language documentation including language preservation and revitalization, community activism, and data collection and dissemination methodologies, among others. Theoretically-oriented chapters provide detailed descriptions and analyses of phonetic, phonological, morphological, syntactic, and semantic phenomena, and connect these to current theoretical issues and debates. *Africa's Endangered Languages* provides thorough coverage of a continent's neglected languages that will spur linguists and Africanists alike to work to protect them.

Architecture of Topic Valéria Molnár 2019-08-19 This volume contains innovative papers that target the linguistic status of topic at the interface between grammar and discourse. The purpose of the volume is to discuss the universal properties of topics and, at the same time, to document the range of discourse-semantic and grammatical variation within this phenomenon in European languages. The volume is structured accordingly: (i) theoretical foundations of topicality in grammar and discourse; (ii) discourse-semantic correlates of topicality; (iii) variation in the grammatical (external and internal) encoding of topicality; (iv) topics from the diachronic perspective. The articles take different perspectives, including contrastive studies of modern languages, studies on diachronic development, and typological generalizations. They also take into consideration various types of empirical data - introspective data, semi-spontaneously produced data, experimental data and language corpora. The articles in this volume show that the concept of topic is necessary for the description and explanation of a number of discourse-semantic phenomena. They present a state of the art account of the architecture of topic while making recent research on the phenomenon accessible to a wider readership.

Male Survivors of Wartime Sexual Violence Philipp Schulz 2020-11-24 A free open access ebook is available upon publication. Learn more at www.luminosoa.org. Although wartime sexual violence against men occurs more frequently than is commonly assumed, its dynamics are remarkably underexplored, and male survivors' experiences remain particularly overlooked. This reality is poignant in northern Uganda, where sexual violence against men during the early stages of the conflict was geographically widespread, yet now accounts of those incidents are not just silenced and neglected locally but also widely absent from analyses of the war. Based on rare empirical data, this book seeks to remedy this marginalization and to illuminate the seldom-heard voices of male sexual violence survivors in northern Uganda, bringing to light their experiences of gendered harms, agency, and justice.

Swarm, Evolutionary, and Memetic Computing, Part II Bijata Ketan Panigrahi 2011-12-14 These two volumes, LNCS 7076 and LNCS 7077, constitute the refereed proceedings of the Second International Conference on Swarm, Evolutionary, and Memetic Computing, SEMCCO 2011, held in Visakhapatnam, India, in December 2011. The 124 revised full papers presented in both volumes were carefully reviewed and selected from 422 submissions. The papers explore new application areas, feature new bio-inspired algorithms for solving specific hard optimization problems, and review the latest progresses in the cutting-edge research with swarm, evolutionary, and memetic computing in both theoretical and practical aspects.

Transitions Theory Afaf I. Meleis, PhD, DrPS (hon), FAAN 2010-02-17 "It is very exciting to see all of these studies compiled in one book. It can be read sequentially or just for certain transitions. It also can be used as a template for compilation of other concepts central to nursing and can serve as a resource for further studies in transitions. It is an excellent addition to the nursing literature." Score: 95, 4 Stars. --Doody's "Understanding and recognizing transitions are at the heart of health care reform and this current edition, with its numerous clinical examples and descriptions of nursing interventions, provides important lessons

that can and should be incorporated into health policy. It is a brilliant book and an important contribution to nursing theory." Kathleen Dracup, RN, DNSc Dean and Professor, School of Nursing University of California San Francisco Afaf Meleis, the dean of the University of Pennsylvania School of Nursing, presents for the first time in a single volume her original "transitions theory" that integrates middle-range theory to assist nurses in facilitating positive transitions for patients, families, and communities. Nurses are consistently relied on to coach and support patients going through major life transitions, such as illness, recovery, pregnancy, old age, and many more. A collection of over 50 articles published from 1975 through 2007 and five newly commissioned articles, *Transitions Theory* covers developmental, situational, health and illness, organizational, and therapeutic transitions. Each section includes an introduction written by Dr. Meleis in which she offers her historical and practical perspective on transitions. Many of the articles consider the transitional experiences of ethnically diverse patients, women, the elderly, and other minority populations. Key Topics Discussed: Situational transitions, including discharge and relocation transitions (hospital to home, stroke recovery) and immigration transitions (psychological adaptation and impact of migration on family health) Educational transitions, including professional transitions (from RN to BSN and student to professional) Health and illness transitions, including self-care post heart failure, living with chronic illness, living with early dementia, and accepting palliative care Organization transitions, including role transitions from acute care to collaborative practice, and hospital to community practice Nursing therapeutics models of transition, including role supplementation models and debriefing models
