*Riding in the Zone* Ken Condon 2019-10-15 Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

**How to Build a Café Racer** Doug Mitchel 2013 What's old is new again, and the newest trend on the block is Cafe Racers. Written by well-known motorcycle and automotive author Doug Mitchel, "How to Build a Cafe Racer" starts with a history lesson. While those first bikes were built in the UK for racing from cafe to cafe, the current rage for Cafe Racers has definitely spread to the US. Converting a stock motorcycle to a Cafe Racer requires more than a fairing and a few decals. The book starts with chapters on planning and choosing an appropriate bike, followed by chapters that detail the modifications that will likely be embraced by anyone converting a stocker to a rocker. From shocks and tires to engine modifications, Doug's book lays out each type of modification and how it's best carried through. The center of the book holds a gallery of finished bikes. These are not just Triumphs or Nortons, but nearly every brand imaginable from Japan, Italy, the UK, and Germany. The final chapters include two, start-to-finish cafe builds. This is the chance for the reader to see how professional shops take a stock Honda, Triumph, or Ducati and convert it into a fast, sexy, and functional Cafe Racer, ready to race from cafe to cafe on Saturday night, or around the race track on Sunday afternoon.
