Prealgebra and Introductory Algebra: An Applied Approach Richard N. Aufmann 2010-03-05 As in previous editions, the focus in PREALGEBRA & INTRODUCTORY ALGEBRA, remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. The role of active participant is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately work similar problems, helps them build their confidence and eventually master the concepts. To this point, simplicity plays a key factor in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully-constructed hierarchy of objectives. This objective-based approach not only serves the needs of students, in terms of helping them to clearly organize their thoughts around the content, but instructors as well, as they work to design syllabi, lesson plans, and other administrative documents. The Second Edition features a new design, enhancing the Aufmann Interactive Method and the organization of the text around objectives, making the pages easier for both students and instructors to follow. Finite Mathematics Stefan Waner 2017-01-27 Full of relevant, diverse, and current real-world applications that students can relate to, Waner and Costenoble's FINITE MATHEMATICS, Seventh Edition, helps your students see the relevance of mathematics in their lives. A large number of the applications are based on real, referenced data from business, economics, and the life and social sciences. Thorough, clearly delineated spreadsheet and TI Graphing Calculator instruction appears throughout the text, supplemented by an acclaimed author website that provides interactive tutorials, powerful utilities, conceptualization tools, review, and practice. The end-of-chapter Technology Notes and Technology Guides are optional, allowing you to include in your courses precisely the amount of technology instruction you choose. Acclaimed for accuracy and readability, FINITE MATHEMATICS appeals to, and is appropriate for, all types of teaching and learning styles. Applied Calculus Geoffrey C. Berresford 2012-01-01 This text uses intriguing real-world applications to engage readers' interest and show them the practical side of calculus. The book's many applications are related to finance, business, and such general-interest topics as learning curves in airplane production, the age of the Dead Sea Scrolls, Apple and Oracle stock prices, the distance traveled by sports cars, lives saved by seat belts, and the cost of a congressional victory. The Sixth Edition maintains the hallmark features that have made APPLIED CALCULUS so popular: contemporary and interesting applications; careful and effective use of technology, including graphing calculator and spreadsheet coverage; constant pedagogical reinforcement through section summaries, chapter summaries, annotated examples, and extra practice problems; Just-in-Time algebra review material; and a variety of exercises that allow readers to practice and hone their problem-solving skills. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Intermediate Algebra Richard N. Aufmann 2012-01-01 Intended for developmental math courses in intermediate algebra, this text retains the hallmark features that have made the Aufmann texts market leaders: an interactive approach in an objective-based framework: a clear writing style, and an emphasis on problem-solving strategies. The acclaimed Aufmann Interactive Method, allows students to try a skill as it is introduced with matched-pair examples, offering students immediate feedback, reinforcing the concept, identifying problem areas, and, overall, promoting student success. Calculus Howard Anton 2021-11 "This twelfth edition of Calculus maintains those aspects of previous editions that have led to the series success—we continue to strive for student comprehension without sacrificing mathematical accuracy, and the exercise sets are carefully constructed to avoid unhappy surprises that can derail a calculus class. All of the changes to the twelfth edition were carefully reviewed by outstanding teachers comprised of both users and nonusers of the previous edition. The charge of this committee was to ensure that all changes did not alter those aspects of the text that attracted users of the eleventh edition and at the same time provide freshness to the new edition that would attract new users. New to this Edition More than 25% of the exercises are either new or revised from the eleventh edition. New applied exercises have been added to the book and some existing applied exercises have been updated. Some prose in the text has been tightened to enhance clarity and student understanding"--
