Austrian Economics Re-examined Gerald P O'Driscoll Jr 2014-12-05 Austrian Economics Re-examined: The Economics of Time and Ignorance is an expanded version of the 1996 edition of The Economics of Time and Ignorance. This work is a classic statement of the role of subjectivism, radical uncertainty and change through real time in Austrian economics specifically, and in modern economics more generally. The new book contains the full text and Introductions of the earlier edition as well as the comprehensive previously-unpublished essay "What is Austrian Economics?" and a new

Introduction. The essay is a comprehensive overview of the central themes of the book from a somewhat different perspective than in the book itself. It supplements the analysis in the book. The new Introduction explains that the 2007-8 financial crisis and recent developments in behavioural economics have made the book more relevant than ever before. Austrian Economic Re-examined develops and systematizes the fundamental principles of the Austrian tradition to the analysis of rational expectations, business cycles, monetary theory competition and monopoly, and capital theory.

Relationship Economics
Lindon J. Robison
2016-04-08 In a 24/7
world and a global
economy, there is no
doubt that relationships
impact virtually every
economic transaction. In
Relationship Economics,
Lindon Robison and Bryan
Ritchie argue that what
needs to be understood
is not just whether
relationships matter
(which, of course, they
do), but also, how much,
and in what
circumstances they
should matter. Providing
a rigorous and
measurable definition of
the way that
relationships among
individuals create a
capital, social capital,
that can be saved,
spent, and used like
other forms of capital,
Robison and Ritchie use
numerous examples and
insightful analysis, to
explain how social
capital shapes our

ability to reduce
poverty, understand
corruption, encourage
democracy, facilitate
income equality, and
respond to
globalization. The first
part of the book
explains how social
capital can be
manipulated, stored,
expended, and invested.
The second part explores
how levels of social
capital within
relationships influence
economic transactions
both positively and
negatively, which in
turn shape poverty
levels, economic
efficiency, levels and
types of political
participation, and
institutional
structures.

confrontation. It is a rich resource for critical engagement. The Encyclopedia conceived and edited by Byron Kaldis is a work of impressive scope and I am delighted to have it on my bookshelf." David Bloor, Edinburgh University "This splendid and possibly unique work steers a skilful course between narrower conceptions of philosophy and the social sciences. It will be an invaluable resource for students and researchers in either or both fields, and to anyone working on the interrelations between them." William Outhwaite, Newcastle University The Encyclopedia of Philosophy and the Social Sciences is the first of its kind in bringing the subjects of philosophy and the social sciences together. It is not only

about the philosophy of the social sciences but, going beyond that, it is also about the relationship between philosophy and the social sciences. The subject of the Encyclopedia is purposefully multi- and inter-disciplinary. Knowledge boundaries are both delineated and crossed over. The goal is to convey a clear sense of how philosophy looks at the social sciences and to mark out a detailed picture of how the two are interrelated: interwoven at certain times but also differentiated and contrasted at others. The Entries cover topics of central significance but also those that are both controversial and on the cutting-edge, underlining the unique mark of this Encyclopedia: the interrelationship between philosophy and

the social sciences, especially as it is found in fresh ideas and unprecedented hybrid disciplinary areas. The Encyclopedia serves a further dual purpose: it contributes to the renewal of the philosophy of the social sciences and helps to promote novel modes of thinking about some of its classic problems.

The Historiography of Economics A.W. Bob Coats 2013-10-08 This is the third and final volume of collected papers of A.W. Bob Coats. Coats began to collect material for this volume in the years following the publication of the second volume in 1993, but sadly died in 2007, before the work was completed. The volume has now been completed under the editorship of Roger Backhouse and

Bruce Caldwell. Along with his articles, the compilation of the volume also reflects Coats' interest in and commitment to book reviews, a selection of which have been chosen for inclusion. The book also includes a comprehensive bibliography. In addition to a preface by Backhouse and Caldwell, the volume also reproduces the obituary that was published in *History of Political Economy*, a memoir published in 1996, and an interview with Grant Fleming, published the previous year. Together, the introductory materials, articles and reviews serve as a fitting tribute to the body of work of Bob Coats.

work in which anthropologists, human geographers, sociologists, and others play important roles. Hence, a tension has arisen between the claims made by Development Economics to be a scientific, measurable discipline prone to wide usage of mathematical modelling, and the more discursive, practice based approach favoured by Development Studies. The aim of this book is to show how the two disciplines have interacted, as well as how they differ. This is crucial in forming an understanding of development work, and to thinking about why policy recommendations can often lead to severe and continuing problems in developing countries. This book introduces Development Economics to those coming from two different but linked perspectives; economists

and students of development who are not economists. In both explaining and critiquing Development Economics, the book is able to suggest the implications of these findings for Development Studies, and more broadly, for development policy and its outcomes. *A Search for Synthesis in Economic Theory* Ching-Yao Hsieh 2019-09-25 First published in 1986. Since the late 1960s the seeming inability of traditional monetary and fiscal policies to combat "stagflation" and address other macroeconomic issues has accelerated the erosion of confidence in the prevailing economic paradigm, the "neoclassical synthesis." * Dissensions among the members of the economics profession on both sides of the Atlantic have grown in number.

1970s, a majority of economists had recognized a " crisis" in economic theory. Parallel to this development, a crisis has also emerged in the Marxian camp. This volume is a discussion from the various schools of thought around three of the salient common grounds follows: the theory of a monetary economy, the disequilibrium foundations of a general equilibrium theory, and a rekindled interest in institutional factors.

Methodology of the Social Sciences, Ethics, and Economics in the Newer Historical School

Peter Koslowski

2012-12-06 The volume at hand gives an exposition of the tradition of the Historical School of Economics and of the Geisteswissenschaften or human sciences, the latter in their development within the Historical School as well as in Neo-Kantianism and the sociology of knowledge. It continues the discussion started in the year 1994 on the Older Historical School

of Economics and the 19th century German contribution to an ethical theory of economics with the Newer Historical School of the 20th century.

Economists, social scientists, and philosophers examine the contribution of this tradition and its impact for present theory. The schools of thought and their approaches to economics as well as to the cultural and social sciences are examined here not as much for their historical interest as for their potential systematic contribution to the contemporary debates on economic ethics, economics, sociology, and philosophy. The volume at hand contains the proceedings of the Fourth Annual SEEP-Conference on Economic Ethics and Philosophy in 1996, "Economics and Ethics in the
