how they became rulers over the Black Nation, how they have redrawn and renamed ancient boundaries to isolate, and ultimately, destroy Black Civilization. The primary reason for the title of the book is to challenge the assertion that "Europe" is a continent. The East does not consist of three separate continents, but one ancient landmass called Asia, (the original home of the Black Nation) that includes East Asia known as "Africa" and West Asia known as "Europe." According to Wikipedia: ...in his 1752 atlas, Emanuel Bowen defined a continent as "a large space of dry land comprehending many countries all joined together, without any separation by water. Thus Europe, Asia, and Africa is one great continent, as America is another" ...The threefold division of the Old World into Europe, Asia and Africa has been in use since the 6th century BC... ..."The border between Asia and Europe has historically been determined by Europeans only...Geographical Asia is a cultural artifact of

European conceptions of the world being imposed onto other cultures an imprecise concept causing endemic contention about what it means." ..."Sir Barry Cunliffe, the emeritus professor of European archaeology at Oxford, argues that Europe has been geographically and culturally merely "the western excrescence of the continent of Asia". Geographically, Asia is the major eastern constituent of the continent of Eurasia with Europe being a northwestern peninsula of the landmass...geologically, Asia, Europe and Africa make up a single continuous landmass (except for the Suez Canal) and share a common continental shelf " ... By redrawing and renaming ancient boundaries, the white race and their cohorts were able to isolate the Black Nation from their "Part," meaning their land, resources, wealth, identity, etc. Psalms Chapter 2:2-3 says: The kings of the earth set themselves and the rulers take counsel together against the Lord and against his anointed, saying

"Let us break their bands asunder, and cast away their cords from us." For a clearer perspective, take note of what Drusilla Dunjee Houston (1876-1941), a pioneer in the study of ancient Black Civilizations has to say in her book, *Wonderful Ethiopians of the Ancient Cushites Empire*, Book I: "The excavations of Petrie revealed in Egypt the remains of a distinct race that preceded the historic Egyptians. The earliest civilization was higher than that of the later dynasties...It was the ancient Cushites empire of Ethiopians...Beside these gigantic achievements, the petty conquests of Alexander the Great, Julius Caesar, and of Napoleon Bonaparte, fade into insignificance." "Recent investigations of Oxford University at Kish in Mesopotamia reveal that the Sumerians were a black people and the founders of the earliest civilization in the world...Most of the articles, [are] all from 5000 to 7000 years old and of pre-Babylonian times" ...Dr.

Samuel A.B. Mercer in his book entitled, *Tutankhamen And Egyptology* (1923), wrote: "The learning of the Egyptians was proverbial in the ancient world... They were also expert agriculturalist...The Egyptians were not a war-like people... [they] were a peace-loving people... Besides being a highly gifted artistic, literary, and scientific people, their depth of moral insight has few parallels in the history of humanity." French philosopher, Constantin François de Chasseboeuf, comte de Volney (1757-1820), said: "Just think, that this race of Black men, today our slave and the object of our scorn, is the very race to which we owe our arts, sciences, and even the use of speech! Just imagine, finally, that it is in the midst of people who call themselves the greatest friends of liberty and humanity that one has approved the most barbarous slavery, and questioned whether Black men have the same kind of intelligence as whites!"...

A Journey of Faith: Moving from the Middle East to the West

Dr. Safwat Bishara 2011-06-20 First, it describes the life of a mainstream, Christian family living in Egypt. The agony involved for the head of the family (the author) to make the decision of taking his wife and three young daughters from the safety of living among family and friends that provided a hedge against the unknown and uncertainty

of moving to another country and a new culture. It describes how Divine intervention tilted the balance in favor going ahead with the decision to move to America. The book entails several circumstances that clearly manifested God's desire for us to leave the country in which we had lived most of our lives. Second, the book describes how the basically Islamic, Arabic culture of the Middle East compares with the essentially Christian culture of the United States. It deals with the subtle underlying teachings of Islam that affect social and spiritual lives of people living in Muslim-majority societies. The book describes how deeply-ingrained ideas can enhance or prohibit advancement of society.

Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

Chapter 2. Can Archetypal Images Contain Chimeras?

Andrey Davydov 2014-09-21 It is logical to suppose that the matrix of human psyche is recorded by exclusively taking into account its transmission "through nations, centuries and cataclysms." According to researchers of antiquity, the human race is tens of thousands to tens of millions years old. Therefore, there must be that language, by the means of which all baseline information about human species could be passed on

from generation to generation. Images of natural objects and phenomena are not only understandable by any inhabitant of the world, regardless of his or her nationality, religious views, level of education and intelligence and so on, but also cannot be destroyed as a result of wars, revolutions, catastrophes, and collapse of cultures, which have occurred in the history of humanity in huge quantities, destroying huge layers of information. According to researchers, about 10,000 years before the Christian era, there was a period that lasted for several centuries, when any knowledge was suppressed, any information got destroyed, monuments were overthrown, and all material traces of disappeared civilizations were literally erased from the face of the earth. With this in mind, the ancient sages went to inconceivable extremes to make certain that their knowledge is preserved.

A People's History of the World

Chris Harman 2017-05-02 A new edition of the bestselling comprehensive history of the world from the perspective of struggling peoples throughout the ages—with a foreword by Howard Zinn From the earliest human societies to the Holy Roman Empire, from the Middle Ages to the Enlightenment, from the Industrial Revolution to the end of the twentieth century, Chris Harman provides a brilliant and comprehensive history of the human race. Eschewing the standard accounts of “Great Men,” of dates and kings, Harman offers a groundbreaking counter-history, a breathtaking sweep across the centuries in the tradition of “history from below.” In a fiery narrative, he shows how ordinary men and women were involved in creating and changing society and how conflict between classes was often at the core of these developments. While

many scholars see the victory of capitalism as now safely secured, Harman explains the rise and fall of societies and civilizations throughout the ages and demonstrates that history moves ever onward in every age. This magisterial study is essential reading for anyone interested in how society has changed and developed and the possibilities for further radical progress. “I have had many people ask me if there is a book which does for world history what my book *A People’s History of the United States* does for this country. I always responded that I know of only one book that accomplishes this extremely difficult task, and that is Chris Harman’s *A People’s History of the World*.” —Howard Zinn

Collectors, Scholars, and Forgers in the Ancient

World Carolyn Higbie
2017-02-02 Collectors, Scholars, and Forgers in the Ancient World focuses on the fascination which works of art, texts, and antiquarian objects inspired in Greeks and Romans in antiquity and draws parallels with other cultures and eras to offer contexts for understanding that fascination. Statues, bronze weapons, books, and bones might have been prized for various reasons: because they had religious value, were the work

of highly regarded artists and writers, had been possessed by famous mythological figures, or were relics of a long disappeared past. However, attitudes towards these objects also changed over time: sculpture which was originally created for a religious purpose became valuable as art and could be removed from its original setting, while historians discovered value in inscriptions and other texts for supporting historical arguments and literary scholars sought early manuscripts to establish what authors really wrote. As early as the Hellenistic era, some Greeks and Romans began to collect objects and might even display them in palaces, villas, or gardens; as these objects acquired value, a demand was created for more of them, and so copyists and forgers created additional pieces--while copyists imitated existing pieces of art, sometimes adapting to their new settings, forgers created new pieces to complete a collection, fill a gap in historical knowledge, make

some money, or to indulge in literary play with knowledgeable readers. The study of forged relics is able to reveal not only what artefacts the Greeks and Romans placed value on, but also what they believed they understood about their past and how they interpreted the evidence for it. Drawing on the latest scholarship on forgery and fakes, as well as a range of examples, this book combines stories about frauds with an analysis of their significance, and illuminates and explores the link between collectors, scholars, and forgers in order to offer us a way to better understand the power that objects held over the ancient Greeks and Romans.

Mencian Hermeneutics Junjie Huang Considered second only to Confucius in the history of Chinese thought, Mencius (371?-289 b.c.), was a moral philosopher whose arguments, while pragmatically rooted in the political and social conditions of his time, go beyond particular situations to probe their origins and

speculate on their larger implications. His writings constitute a living tradition in China and the world at large. Sinological studies of Mencius have long emphasized philological and archaeological research, situating the texts mainly in Chinese history. Critical appraisal of the texts lends itself to Western traditions of interpretation. In *Mencian Hermeneutics*, Chun-chieh Huang utilizes both approaches to offer a historical and universal understanding of Mencius. Huang builds from the premise that Mencius' thinking and all Chinese thought are sociopolitical in tone and humanistic and metaphysical in nature and range. The strength of Mencius' thought lies in the organic mutuality of these factors. His arguments are shaped by the politics, literature, and economics of his age. At the same time, the concrete programs he proposed and his sharp criticisms of alternative policies are rooted in the metaphysical soil of man and

the world, human solidarity and cosmic symbiosis, and human nature within the natural world. The book is divided into two parts. Part 1 analyzes the concrete as opposed to the theoretical character of Mencius' thought. Huang demonstrates the organic unity of his intellectual system with its concepts of linkage between innermost to outermost, self to social, rightness vs. profit, and his political ideal of populist government through familial empathy. Part 2 deals with the long historical odyssey of Mencius' work in China's interpretive tradition, an exegetical process similar in its origins to Western hermeneutics. In comparing and analyzing these approaches to Mencius, Huang seeks to show that Chinese hermeneutics is more than an activity of intellectual curiosity about the ancient world, but is instead a means to sociopolitical action, an application in society of the fruits of personal cultivation. Mencian Hermeneutics will be

of interest to Chinese area specialists, sociologists, literary scholars, and philosophers. Chun-chieh Huang is a professor of history and chairman of the Commission of General Education at National Taiwan University in Taipei. He is the author of five books on Confucianism and five books on Taiwan.

History Alive! Teachers' Curriculum Institute 2004 *Discarded, Discovered, Collected* Arthur Verhoogt 2017-10-05 Discarded, Discovered, Collected provides an accessible introduction to the University of Michigan's collection of papyri and related ancient materials, the widest and deepest resource of its kind in the Western

hemisphere. The collection was founded in the early part of the 20th century by University of Michigan Professor of Classics Francis W. Kelsey. His original intention was to create a set of artifacts that would be useful in teaching students more directly about the ancient world, at a time when trips to ancient sites were much harder to arrange. Jointly administered by Michigan's Department of Classical Studies and its Library, the collection has garnered significant interest beyond scholarly circles and now sees several hundred visitors each

year. Of particular note among its holdings are sixty pages of the earliest known copy of the Epistles of St. Paul, which are often featured on tours of the collection by groups from religious institutions. Arthur Verhoogt, one of the current stewards of the Papyrology Collection, provides clear, insightful information in an appealing style to engage general readers and scholars alike. Extensively illustrated with some of the collection's more spectacular pieces, this volume describes what the collection is, what kinds of ancient texts it contains, and how it has developed from Francis Kelsey's day to the present. Verhoogt describes in detail how people who study papyri carry out their work, and how papyri contribute to our understanding of various aspects of the ancient Greco-Roman world. Translations of the ancient texts are presented so that the reader can experience some of the excitement that comes with reading original documents from many centuries ago.

"Those who find ugly meanings in beautiful things are corrupt without being charming. This is a fault. Those who find beautiful meanings in beautiful things are the cultivated. For these there is hope. They are the elect to whom beautiful things mean only Beauty. There is no such thing as a moral or an immoral book. Books are well written, or badly written. That is all." — Oscar Wilde, The Picture of Dorian Gray A man sells his soul for eternal youth and scandalizes the city in Oscar Wilde's The Picture of Dorian Gray.

On Justice Mathias Risse

2020-09-10 Though much attention has been paid to different principles of justice, far less has been done reflecting on what the larger concern behind the notion is. In this work, Mathias Risse proposes that the perennial quest for justice is about ensuring that each individual has an appropriate place in what our uniquely human capacities permit us to build, produce, and maintain, and is appropriately respected for the capacity to hold such a place to begin with. Risse begins by investigating the role of political philosophers and exploring how to think about the global context where philosophical inquiry occurs. Next, he offers a quasi-historical narrative about how the notion of distributive justice identifies a genuinely human concern that arises independently of cultural context and has developed into the one we should adopt now. Finally, he investigates the core terms of this view,

including stringency, moral value, ground and duties of justice.
