DSL Engineering Markus Voelter 2013 The definitive resource on domain-specific languages: based on years of real-world experience, relying on modern language workbenches and full of examples. Domain-Specific Languages are programming languages specialized for a particular application domain. By incorporating knowledge about that domain, DSLs can lead to more concise and more analyzable programs, better code quality and increased development speed. This book provides a thorough introduction to DSL, relying on today's state of the art language workbenches. The book has four parts: introduction, DSL design, DSL implementation as well as the role of DSLs in various aspects of software engineering. Part I Introduction: This part introduces DSLs in general and discusses their advantages and drawbacks. It also defines important terms and concepts and introduces the case studies used in the most of the remainder of the book. Part II DSL Design: This part discusses the design of DSLs - independent of implementation techniques. It reviews seven design dimensions, explains a number of reusable language paradigms and points out a number of process-related issues. Part III DSL Implementation: This part provides details about the implementation of DSLs with lots of code. It uses three state-of-the-art but quite different language workbenches: JetBrains MPS, Eclipse Xttext and TU Delft's Spoofox. Part IV DSLs and Software Engineering: This part discusses the use of DSLs for requirements, architecture, implementation and product line engineering, as well as their roles as a developer utility and for implementing business logic. The book is available as a printed version (the one you are looking at) and as a PDF. For details see the book's companion website at http: //dslbook.org

Regulating New Technologies in Uncertain Times Leonie Reins 2019-03-21 This book deals with questions of democracy and governance relating to new technologies. The deployment and application of new technologies is often accompanied with uncertainty as to their long-term (un)intended impacts. New technologies also raise questions about the limits of the law as the line between harmful and beneficial effects is often difficult to draw. The volume explores overarching concepts on how to regulate new technologies and their implications in a diverse and constantly changing society, as well as the way in which regulation can address differing, and sometimes conflicting, societal objectives, such as public health and the protection of privacy. Contributions focus on a broad range of issues such as Citizen Science, Smart Cities, big data, and health care, but also on the role of market regulation for new technologies.The book will serve as a useful research tool for scholars and practitioners interested in the latest developments in the field of technology regulation. Leonie Reins is Assistant Professor at the Tilburg Institute for Law, Technology, and Society (TILT) in The Netherlands.

Governance of Innovation Maarten J. Arentsen 2010 Extensive and comprehensive, this book illustrates that innovation is a complex and rich phenomenon with many dimensions and aspects. **Extreme Weight Loss** Sarah Trainer 2021-04-20 A study that explores patients' perspectives on a life-altering surgery Bariatric surgery rates around the world have increased exponentially over the past decade. In Extreme Weight Loss, anthropologists Sarah Trainer, Alexandra Brewis, and Amber Wutich provide us with an inside look at how patients experience this medical procedure, as well as its far-reaching and complex personal implications. Drawing on patient interviews, survey data, and more, Trainer, Brewis, and Wutich explore why people decide to undergo bariatric surgery, and how that decision transforms their lives. They show, in painstaking detail, how the journey to weight loss is can be at once painful and liberating, dispiriting and self-affirming. Extreme Weight Loss explores questions about which bodies are treated as though they belong in modern societies, and which bodies are treated as unwanted. It considers how people challenge and manage these unfair standards, illuminating what it means to be large-bodied in America's diet-obsessed culture.

The Applied Anthropology of Obesity Chad T. Morris 2015-12-24 The Applied Anthropology of Obesity advances understanding of the many cultural factors underlying increased global obesity prevalence. This book candidly discusses obesity research, prevention, and intervention programs, providing rich information about social identity, obesity prevention, and treatment.

Google It Newton Lee 2016-10-23 From Google search to self-driving cars to human longevity, is Alphabet creating a neoteric Garden of Eden or Bentham's Panopticon? Will King Solomon's challenge supersede the Turing test for artificial intelligence? Can transhumanism mitigate existential threats to humankind? These are some of the overarching questions in this book, which explores the impact of information awareness on humanity starting from the Book of Genesis to the Royal Library of Alexandria in the 3rd century BC to the modern day of Google Search, IBM Watson, and Wolfram|Alpha. The book also covers Search Engine Optimization, Google AdWords, Google Maps, Google Local Search, and what every business leader must know about digital transformation. "Search is curiosity, and that will never be done," said Google's first female engineer and Yahoo's sixth CEO Marissa Mayer. The truth is out there; we just need to know how to Google it!

Doing School Denise Clark Pope 2008-10-01 This book offers a highly revealing and troubling view of today's high school students and the ways they pursue high grades and success. Denise Pope, veteran teacher and curriculum expert, follows five motivated and successful students through a school year, closely shadowing them and engaging them in lengthy reflections on their school experiences. What emerges is a double-sided picture of school success. On the one hand, these students work hard in school, participate in extracurricular activities, serve their communities, earn awards and honours, and appear to uphold school values. But on the other hand, they feel that in order to get ahead they must compromise their values and manipulate the system by scheming, lying, and cheating. In short, they do school, that is, they are not really engaged with learning nor can they commit to such values as integrity and community. The words and actions of these five students - two boys and three girls from diverse ethnic and socioeconomic backgrounds - underscore the frustrations of being caught in a grade trap that pins future success to high grades and test scores. Their stories raise critical questions that are too important for parents, educators, and community leaders to ignore. Are schools cultivating an environment that promotes intellectual curiosity, cooperation, and integrity? Or are they fostering anxiety, deception, and hostility? Do today's schools inadvertently impede the very values they claim to embrace? Is the success that current assessment practices measure the kind of success we want for our children?

Mastering Regular Expressions Jeffrey E. F. Friedl 2002 Introduces regular expressions and how they are used, discussing topics including metacharacters, nomenclature, matching and modifying text, expression processing, benchmarking, optimizations, and loops.

Access to Modern Energy Services for Health Facilities in Resource-constrained Settings World Health Organization 2015 "This study is a joint effort by WHO, aimed at improving quality, safety and accessibility of health services in support of universal health coverage, and The World Bank in furtherance of the Energy Sector Management Assistance Program (ESMAP)-funded activity on Defining and Measuring Access to Energy for Socio-Economic Development. The WHO inputs are drawn from two years of comprehensive review of energy use in the health sector as part of the Health in the Green Economy series, for which the preliminary findings were published in 2011 and the full report is to be published in 2015. The study also draws upon the framework for measuring energy access developed by the World Bank in consultation with partner agencies to track progress under the Sustainable Energy for All (SE4All) initiative."--Publisher's description.

Teaching Nonprofit Management Karabi C. Bexboruah 2020-04-24 This peer-reviewed edited volume provides strategies and practices for teaching nonprofit management theories and concepts in the context of the undergraduate, graduate, and online classroom environments.

Humanistic Management Michael Pirson 2017-09-14 In a world facing multiple crises, our foundational institutions are failing to offer effective solutions. Drawing on the emerging consilience of knowledge, Michael Pirson debunks the fundamental yet outdated assumptions of human nature that guide twentieth-century management theory and practice - as captured in the 'economistic' paradigm - and instead provides an urgently needed conceptual and practical 'humanistic' framework, based on the protection of human dignity and the promotion of well-being. By outlining the science-based pillars of this innovative system, Pirson provides a twenty-first-century model for the responsible twenty-first-century leader seeking sustainable ways to organize in a world of crisis. Highlighting relevant applications for research, practice, teaching and policy, this book is ideal for graduate students and professionals seeking to develop their understanding of responsible business, business ethics and corporate responsibility.

Abortion Worldwide 2009 "This report assesses progress over the past decade regarding the legality, safety and accessibility of abortion services worldwide. It summarizes developments in policy and documents recent trends in abortion incidence, with a focus on unsafe abortion. It also examines the relationship between unintended pregnancy, contraception and abortion, placing abortion within the broader context of women's reproductive lives." - p. 4.

Environmental Social Sciences Ismael Vaccaro 2010-11-11 The relationship between human communities and the environment is extremely complex. In order to resolve the issues involved with this relationship, interdisciplinary research combining natural sciences, social sciences, and humanities is necessary. In this 2010 book, specialists summarise methods and research strategies for various aspects of social research devoted to environmental issues. Each chapter is illustrated with ethnographic and environmental examples, ranging from Australia to Amazonia, from Madagascar to the United States, and from prehistoric and historic cases to contemporary rural and urban ones. It deals with climate change, deforestation, environmental knowledge, natural reserves, politics and ownership of natural resources, and the effect of differing spatial and temporal scales. Contributing to the intellectual project of interdisciplinary environmental social science, this book shows the possibilities social science can provide to environmental studies and to larger global problems and thus will be of equal interest to social and natural scientists and policy makers. *Frontiers of Human-Centered Computing, Online Communities and Virtual Environments* Rae Earnshaw 2012-12-06 Rae Earnshawand John A. Vince -.- . . . ---- 1 Introduction The USPresident's Information Technology Advisory Committee (PITAC)recently advised the US Senate of the strategic importance of investing in IT for the 21st century, particularlyin the areas of software,human-computer interaction, scalable information infrastructure, high-end computing and socioeconomic issues [1]. Research frontiers ofhuman-computer interaction include the desire that interaction be more centered around human needs and capabilities, and that the human environment be considered in virtual environments and in other contextual infor mation-processing activities. The overall goal is to make users more effective in their information or communication tasks by reducing learning times, speeding performance, lowering error rates, facilitating retention and increasing subjective satisfaction. Improved designs can dramatically increase effectiveness for users, who range from novices to experts and who have diverse cultures with varying educational backgrounds. Their lives could be made more satisfying, their work safer, their learning easier and their health better.

Rapid Ethnographic Assessments Thurka Sangaramoorthy 2020-04-02 This book provides provides a practical guide to understanding and conducting rapid ethnographic assessments (REAs) with an emphasis on their use in public health contexts. This team-based, multi-method, relatively low-cost approach results in rich understandings of social, economic, and policy factors that contribute to the root causes of an emerging situation and provides rapid, practical feedback to policy makers and programs. Using real-world examples and case studies of completed REAs, Sangaramoorthy and Kroeger provide readers with a logical, easy-to-follow introduction into key concepts, principles, and methods of REAs, including interview and observation techniques, triangulation, field notes and debriefing, theoretical saturation, and qualitative analysis. They also provide a practical guide for planning and implementing REAs and suggestions for transforming findings into written reports and actionable recommendations. Materials and detailed tools regarding the conduct of REAs are designed to help readers apply this method to their own research regardless of topic or discipline. REA is an applied approach that can facilitate collaborative work with communities and become a catalyst for action. Rapid Ethnographic Assessment will appeal to professionals and researchers interested in using REAs for research efficiency and productivity as well as action-oriented and translational research in a variety of fields and contexts.

Responsible Management Education Principles for Responsible Management Education 2021-12-17 The ebook will be Open Access and made available on publication. Written by many of the key influencers at the Principles for Responsible Management Education (PRME), the book focuses on advancing sustainable development into education, research and partnerships at higher education institutions and, specifically, at business schools, with the purpose of educating responsible leaders for today and tomorrow. The book serves as a concrete source of inspiration for universities and other stakeholders in higher education on structures, processes and content for how to advance responsible management education and sustainable development. It articulates the importance of key themes connected with climate change, gender equality, anti-corruption, business for peace, anti-poverty and other topics that are related to the Sustainable Development Goals (SDGs). The book emphasizes the significance of local-global interaction, drawing on local action at management schools in combination with global knowledge exchange across the PRME community. In addition, the book clearly demonstrates the background, key milestones and successful achievements of PRME as a global movement by management schools in collaboration with a broader community of higher education professionals. It exemplifies action in various local geographies in PRME Chapters, PRME Working Groups and the PRME Champions work to advance responsible management education. The authors of the book are all globally experienced deans, professors, educators, executives and students with a global outlook, who are united to advance responsible management education locally and globally. The book will be invaluable reading for university leaders, educators, business school deans and students wanting to understand and embed responsible management education approaches across their institutions and curricula.

Programming VB .NET Jonathan Morrison 2008-01-01 In Programming VB .NET: A Guide for Experienced Programmers, authors Gary Cornell and Jonathan Morrison carefully explain the exciting features of Visual Basic .NET. Since VB .NET is, for all practical purposes, a whole new language even for the most experienced Visual Basic programmers, developers need to think differently about many familiar topics. Cornell and Morrison are there to help you with careful discussions of each topic. Cornell and Morrison write from the point of view of the experienced programmer, with constant references to the

changes from earlier versions of VB. Developers learn how to use VB .NET for database programming through ADO.NET and web programming through ASP.NET. After reading Programming VB .NET: A Guide for Experienced Programmers, developers will have a firm grasp of the exciting VB .NET language and its uses in creating powerful .NET applications.

Mastering Regular Expressions Jeffrey E.F. Friedl 2006-08-08 Regular expressions are an extremely powerful tool for manipulating text and data. They are now standard features in a wide range of languages and popular tools, including Perl, Python, Ruby, Java, VB.NET and C# (and any language using the .NET Framework), PHP, and MySQL. If you don't use regular expressions yet, you will discover in this book a whole new world of mastery over your data. If you already use them, you'll appreciate this book's unprecedented detail and breadth of coverage. If you think you know all you need to know about regularexpressions, this book is a stunning eye-opener. As this book shows, a command of regular expressions is an invaluable skill. Regular expressions allow you to code complex and subtle text processing that you never imagined could be automated. Regular expressions can save you time and aggravation. They can be used to craft elegant solutions to a wide range of problems. Once you've mastered regular expressions, they'll become an invaluable part of your toolkit. You will wonder how you ever got by without them. Yet despite their wide availability, flexibility, and unparalleled power, regular expressions are frequently underutilized. Yet what is power in the hands of an expert can be fraught with peril for the unwary. Mastering Regular Expressions will help you navigate the minefield of becoming an expert and help you optimize your use of regular expressions. Mastering Regular Expressions, Third Edition, now includes a full chapter devoted to PHP and its powerful and expressive suite of regular expression functions, in addition to enhanced PHP coverage in the central "core" chapters. Furthermore, this edition has been updated throughout to reflect advances in other languages, including expanded in-depth coverage of Sun's java.util.regex package, which has emerged as the standard Java regex implementation.Topics include: A comparison of features among different versions of many languages and tools How the regular expression engine works Optimization (major savings available here!) Matching just what you want, but not what you don't want Sections and chapters on individual languages Written in the lucid, entertaining tone that makes a complex, dry topic become crystal-clear to programmers, and sprinkled with solutions to complex real-world problems, Mastering Regular Expressions, Third Edition offers a wealth information that you can put to immediateuse. Reviews of this new edition and the second edition: "There isn't a better (or more useful) book available on regular expressions." --Zak Greant, Managing Director, eZ Systems "A real tour-de-force of a book which not only covers the mechanics of regexes in extraordinary detail but also talks about efficiency and the use of regexes in Perl, Java, and .NET...If you use regular expressions as part of your professional work (even if you already have a good book on whatever language you're programming in) I would strongly recommend this book to you." --Dr. Chris Brown, Linux Format "The author does an outstanding job leading the reader from regexnovice to master. The book is extremely easy to read and chock full ofuseful and relevant examples...Regular expressions are valuable toolsthat every developer should have in their toolbox. Mastering RegularExpressions is the definitive guide to the subject, and an outstandingresource that belongs on every programmer's bookshelf. Ten out of TenHorseshoes." --Jason Menard, Java Ranch

Kali Linux --Assuring Security by Penetration Testing Lee Allen 2014-04-07 Written as an interactive tutorial, this book covers the core of Kali Linux with real-world examples and step-by-step instructions to provide professional guidelines and recommendations for you. The book is designed in a simple and intuitive manner that allows you to explore the whole Kali Linux testing process or study parts of it individually. If you are an IT security professional who has a basic knowledge of Unix/Linux operating systems, including an awareness of information security factors, and want to use Kali Linux for penetration testing, then this book is for you.

Alternative Theories of the Firm Michael Pirson 2021-12-29 The Theory of the Firm is commonly viewed as axiomatic by business school academicians. Considerations spanning organizational structures, their boundaries and roles, as well as business strategies all relate to the theory of the firm. The dominant theory of the firm posits that markets act perfectly to maximize the well-being of society when people act to maximize the personal utility of their individual purchases and firms act to maximize financial returns to their owners. However, burgeoning evidence and discourse across the scientific and policy communities suggests that the economic, social, and environmental consequences of accepting and applying this theory in the organization of business and society threatens the survival of the human species, among countless others. This book provides the latest thinking on alternatives to the theory of the firm as cornerstone of managerial decision making. Authors explore and elucidate theories that help us understand a firm differently and suggest alternatives to the theory of the firm. This book will be of value to researchers, academics, practitioners, and students interested in leadership, strategic management, and the intersection of corporate interests and the wellbeing of society.

Vi Improved, Vim Steve Qualline 2001 Real Linux users don't use GUIs. No matter how popular, slick and sophisticated the interfaces become for Linux and UNIX, you'll always need to be able to navigate in a text editor. The vi editor is the original standard UNIX full screen editor. It's been around almost since UNIX began and it has changed very little. To get around the limitations of vi the people at Bram Moolenaar created the vim editor (the name stand for Vi iMproved). It contains many more features than the old vi editor including: help, multiple windows, syntax highlighting, programmer support, and HTML support. All of the books published to date focus on vi alone not the expanded vim shipping with every major Linux distribution. In true New Riders' form, the vim reference will be a definitive, concise reference for the professional Linux user and developer. This tutorial takes a task oriented approach allowing you to learn only the commands that make your job easier.

Open Source Intelligence Tools and Resources Handbook i-Intelligence 2019-08-17 2018 version of the OSINT Tools and Resources Handbook. This version is almost three times the size of the last public release in 2016. It reflects the changing intelligence needs of our clients in both the public and private sector, as well as the many areas we have been active in over the past two years.

Death by China Peter Navarro 2011-05-05 The world's most populous nation and soon-to-be-largest economy is rapidly turning into the planet's most efficient assassin. Unscrupulous Chinese entrepreneurs are flooding world markets with lethal products. China's perverse form of capitalism combines illegal mercantilist and protectionist weapons to pick off American industries, job by job. China's emboldened military is racing towards head-on confrontation with the U.S. Meanwhile, America's executives, politicians, and even academics remain silent about the looming threat. Now, best-selling author and noted economist Peter Navarro meticulously exposes every form of "Death by China," drawing on the latest trends and events to show a relationship spiraling out of control. Death by China reveals how thousands of Chinese cyber dissidents are being imprisoned in "Google Gulags"; how Chinese hackers are escalating coordinated cyberattacks on U.S. defense and America's key businesses; how China's undervalued currency is damaging the U.S., Europe, and the global recovery; why American companies are discovering that the risks of operating in China are even worse than they imagined; how China is promoting nuclear proliferation in its pursuit of oil; and how the media distorts the China story—including a "Hall of Shame" of America's worst China apologists. This book doesn't just catalogue China's abuses: It presents a call to action and a survival guide for a critical juncture in America's history—and the world's. Publisher's note - in this book various quotes and viewpoints are attributed to a 'Ron Vara'. Ron Vara is not an actual person, but rather an alias created by Peter Navarro in order to present his views and opinions.

Kids at Work Emir Estrada 2019-07-16 How Latinx kids and their undocumented parents struggle in the informal street food economy Street food markets have become wildly popular in Los Angeles—and behind the scenes, Latinx children have been instrumental in making these small informal businesses grow. In Kids at Work, Emir Estrada shines a light on the surprising labor of these young workers, providing the first ethnography on the participation of Latinx children in street vending. Drawing on dozens of interviews with children and their undocumented parents, as well as three years spent on the streets shadowing families at work, Estrada brings attention to the unique set of hardships Latinx youth experience in this occupation. She also highlights how these hardships can serve to cement family bonds, develop empathy towards parents, encourage hard work, and support children—and their parents—in their efforts to make a living together in the United States. Kids at Work provides a compassionate, up-close portrait of Latinx children, detailing the complexities and nuances of family relations when children help generate income for the household as they peddle the streets of LA alongside their immigrant parents.

Mastering E-Business Infrastructure Veljko Milutinovic 2012-12-06 As a foreword, here we publish an email letter of Late Professor Herb Simon, Nobel Laureate, that he wrote on the occasion ofthe death of the fatherofa friend. This letterofcondolence, more than any other wisdom, tells about the essence of the process of scientific creation, which is so important for both, the specific subject being covered by this book, and for the general science. When asked to address an SSGRR conference in Italy, prior to his death, Professor Herb Simon agreed that these lines be presented to all those who are interested in understanding the real essence oftheir own scientific struggle. Dear Professor Milutinovic: I want to extend my deepest sympathy to you and your family on the death of your father. His career was a very distinguished one, and his life spanned a most complex and difficult sequence of epochs in your country's history. Our generation (I am just a year younger than he was), like all its predecessors, leaves many tasks - hopefully no more than it inherited - for the next generation to take up; but even knowing that it must be so does not remove one's senseofloss in the parting.

Fat in Four Cultures Cindi SturtzSreetharan 2021-06-01 Traits that signal belonging dictate our daily routines, including how we eat, move, and connect to others. In recent years, "fat" has emerged as a shared anchor in defining who belongs and is valued versus who does not and is not. The stigma surrounding weight transcends many social, cultural, political, and economic divides. The concern over body image shapes not only how we see ourselves, but also how we talk, interact, and fit into our social networks, communities, and broader society. Fat in Four Cultures is a co-authored comparative ethnography that reveals the shared struggles and local distinctions of how people across the globe are coping with a bombardment of anti-fat messages. Highlighting important differences in how people experience "being fat," the cases in this book are based on fieldwork by five anthropologists working together simultaneously in four different sites across the globe: Japan, the United States, Paraguay, and Samoa. Through these cases, Fat in Four Cultures considers what insights can be gained through systematic, cross-cultural comparison. Written in an eye-opening and narrative-driven style, with clearly defined and consistently used key terms, this book effectively explores a series of fundamental questions about the present and future of fat and obesity.

The Role of Human Factors in Home Health Care National Research Council 2010-11-14 The rapid growth of home health care has raised many unsolved issues and will have consequences that are far too broad for any one group to analyze in their entirety. Yet a major influence on the safety, quality, and effectiveness of home health care will be the set of issues encompassed by the field of human factors research—the discipline of applying what is known about human capabilities and limitations to the design of products, processes, systems, and work environments. To address these challenges, the National Research Council began a multidisciplinary study to examine a diverse range of behavioral and human factors issues resulting from the increasing migration of medical devices, technologies, and care practices into the home. Its goal is to lay the groundwork for a thorough integration of human factors research with the design and implementation of home health care devices, technologies, and practices. On October 1 and 2, 2009, a group of human factors and other experts met to consider a diverse range of behavioral and human factors issues associated with the increasing migration of medical devices, technologies, and care practices into the home. This book is a summary of that workshop, representing the culmination of the first phase of the study.
