Singing in Czech Timothy Cheek 2014-12-11 Timothy Cheek's revised edition of Singing in Czech: A Guide to Czech Lyric Diction and Vocal Repertoire, with its accompanying audio accessible online, builds on the original pioneering work of 2001 that set "a new and very welcome high standard for teaching lyric diction," according to Notes: The Journal of the Music Library Association. It offers users updated information, important clarifications, and expanded repertoire in a more accessible, easier to use format. Singing in Czech is divided into two parts. Using IPA, the first part takes the reader systematically through each sound of the Czech language, enhanced by recordings of native Czech opera singers. Chapters cover the Czech vowels, consonants, rules of assimilation, approaches to singing double consonants, stress and length, Moravian dialect, and an introduction to singing in Slovak. Fine points of formal pronunciation have been clarified in this revised edition. In the second part, Cheek offers a thorough overview of Czech art song, expanded from the first edition. Texts to major song literature and opera excerpts by Smetana, Dvořák, Janáček, Martinů, and Haas, with timings, editions, word-for-word translations, idiomatic translations, and IPA transcriptions follow. In this revision, Cheek has included additional cycles by Dvořák and Martinů, and two new chapters on Czech female composers Vítězslava Kaprálová and Sylvie Bodorová. This revised edition of Singing in Czech is useful for all those who are interested and engaged in the performance of the rich Czech vocal repertoire.

The Six Ways of Atheism Geoffrey Berg 2009 Geoffrey Berg, a graduate of Cambridge University, England, believes the case for atheism has never been put in as forceful and logically cogent a way as it merits, least of all by the great philosophers. In this book he sets out to remedy that by strengthening some traditional atheistic arguments and by initiating some new logical arguments for atheism. Geoffrey Berg develops six simple completely logical arguments in clear language that practically everybody can understand in a way that has never been done before to prove that belief in God is not merely unsupported by Logic but is actually contrary to Logic. This is a groundbreaking book because it is probably the first attempt by a single author that devotes an entire book to absolutely disproving the existence of God, all the time matching verbal arguments with strictly logical formulations of the argument. It aims to crystallize the case for atheism in a way that has not been done before. It is likely in retrospect to be seen as a landmark book because some of the novel arguments in this book are likely to be used hereafter by people around the world.

Medical Anthropology Andrea S. Wiley 2009 Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Fashion, Desire and Anxiety Rebecca Arnold 2001 Fashion, and the glossy magazines it inhabits, allow Western culture to dream. It permits a person to fantasize and to experiment with new identities. It flaunts glamour and success. Appearance becomes something to be perfected and admired. These dreams and freedoms, Rebecca Arnold proposes, are contradictory. Fashion and its surrounding imagery elicit fear and anxiety in their consumers as well as pleasure. Fashion has come to incorporate the underside of modern life, with violence and decay becoming a dominant theme in clothing design and photography. Arnold draws on diverse written sources to explore the complex nature of modern fashion. She discusses a range of key themes: how fashion uses and abuses the power of wealth; the alienating promotion of "good" taste; the power plays of sex and display; and how identities can be blurred to disguise and confuse. In order to unravel the contradictory emotions of desire and anxiety they provoke, she never loses sight of the historical and cultural contexts in which fashion designers and photographers perform. Generously illustrated, Fashion, Desire and Anxiety focuses on the last thirty years, from photographic works of the 1970s to the beginning of the twenty-first century.

Radar Instruction Manual United States. Maritime Administration 2005 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs
