StrengthsQuest Donald O. Clifton 2016-01-01 Students who use their natural talents achieve the most --- but they need to know what those talents are. StrengthsQuest includes the Clifton StrengthsFinder, an online assessment that reveals students' top five themes of talent. And StrengthsQuest also helps students make the most of those talents. Students and learners of all ages continually face the challenges of gaining direction, making decisions, and building self-confidence. Fortunately, the keys to successfully meeting these challenges – your own natural talents – already exist within you. Through these talents, you will produce your greatest achievements. Over the course of 30 years, Gallup conducted millions of psychological interviews and identified 34 themes of talent that are indicative of success. In the StrengthsQuest program, Gallup offers you the opportunity to discover talents from your top five themes and build on them to achieve academic, career, and personal excellence. More than 100,000 students have benefited from the program. Your quest starts with the Clifton StrengthsFinder, a 30-minute assessment that reveals your top five themes of talent. This online assessment is your entryway to a variety of experiences that will help you discover your greatest talents and develop strengths. You'll gain access to action items specific to your top themes, covering general academic life, study habits, relationships, and career. You'll also be challenged to think about applying your talents for success in other settings, such as on projects and teams and in leadership. StrengthsQuest was written by the late Donald O. Clifton, who was the former chairman of Gallup; coauthor of the bestseller *Now, Discover Your Strengths*; and recognized as the Father of Strengths-Based Psychology and the late Edward “Chip” Anderson, who taught education, psychology, and leadership at UCLA and Azusa Pacific University. Revised portions of the text were written by Laurie A. Schreiner, who has taught psychology and higher education at Azusa Pacific University and Eastern University. Leadership and Management Development in Education Tony Bush 2008-03-17 'This is a very good and much needed book. Written by a very experienced researcher and teacher in the education leadership world it brings together a wealth of understanding and insights in the field of leadership and management development in education' - International Journal of Educational Management "[T]his book is an excellent survey of practice on a truly international scale which many will find valuable' - Educational Management Administration and Leadership "Few people could be better qualified to write about this topic than Tony Bush. The book draws on a wealth of experience and detailed research. Typically, it is extremely well structured, written with great clarity, and combines the highest levels of scholarship with an accessible style that will enable it to appeal to a wide audience. This is a book that many in the field have been waiting for' - Professor Mark Brundrett, Professor of Educational Research, Liverpool John Moores University, Liverpool 'This book is far and away the best international comparative study of leadership development for schools. There are countless books highlighting the importance of leadership but none have satisfactorily gone to the heart of the issue, especially for developed and developing countries, and Tony Bush has done it here. It is a sure guide to policymakers, practitioners and researchers who want to make a difference' - Professor Brian J. Caldwell, Managing Director of Educational Transformations and former Dean of Education at the University of Melbourne, Australia Leadership is critical to educational development and specific preparation is vital if leaders are to maximise their effectiveness. In this major new text, Tony Bush draws on his extensive international experience and research to examine the case for leadership development and assess the different modes of preparation used in Europe, including the U.K., North America, Asia Pacific, Australia, New Zealand and Africa. He also examines research on how leadership impacts on school and student outcomes and considers future directions for leadership and management development in education. This text is essential reading for students of educational leadership and management as well as for policy-makers, headteachers and principals. **The Pediatric Emergency Medicine Resource** Marianne Gausche-Hill 2007 APLS: The Pediatric Emergency Medicine Resource, Revised Fourth Edition offers the information necessary to assess and manage critically ill or injured children during the first hours in the emergency department. The Revised Fourth Edition of APLS is truly the body of knowledge in pediatric emergency medicine. If you want the newest, most comprehensive reference on pediatric emergency medicine, the Revised Fourth Edition will meet your needs. Developed by expert authors, editors, and faculty from both AAP and ACEP, the new APLS is a unique teaching and learning system for individual physicians, residents, students, and APLS instructors and course directors. The Fourth Edition of APLS has been revised and expanded to cover new conclusions drawn from reason, fact, and experience to the benefit of sick and injured children worldwide. Together, AAP and ACEP developed APLS into a new, stand-alone course, offering continuing medical education units and an APLS course completion card. The course is highly interactive with small group scenarios, hands-on skill stations, and case-based lectures.

Acutely ill infant Sics Editore 2014-10-01 Signs and symptoms are often difficult to interpret in infants, so a complete examination must always be conducted. An infant may present with only a few signs even when seriously ill. The younger the infant, the more likely it is that the illness is serious and will require hospitalization. In practice, 3 months may be considered as the cut off point; particular vigilance should be exercised if the infant is less than 1 month old.Listen to the parents. A detailed history will guide the doctor more quickly towards the right diagnosis, and unnecessary investigations need not be carried out.An afebrile infant with good muscle tone, who feeds well and shows satisfactory growth is rarely seriously ill.If the general condition of the infant is reduced, make an emergency referral for further care in a hospital.

Admission Assessment Exam Review E-Book HESI 2020-01-24 Passing the HESI Admission Assessment Exam is the first step on the journey to becoming a successful healthcare professional. Be prepared to pass the exam with the most up-to-date HESI Admission Assessment Exam Review, 5th Edition! From the testing experts at HESI, this user-friendly guide walks you through the topics and question types found on admission exams, including: math, reading comprehension, vocabulary, grammar, biology, chemistry, anatomy and physiology, and physics. The guide includes hundreds of sample questions as well as step-by-step explanations, illustrations, and comprehensive practice exams to help you review various subject areas and improve test-taking skills. Plus, the pre-test and post-test help identify your specific weak areas so study time can be focused where it's needed most. HESI Hints boxes offer valuable test-taking tips, as well as rationales, suggestions, examples, and reminders for specific topics. Step-by-step explanations and sample problems in the math section show you how to work through each and know how to answer. Sample questions in all sections prepare you for the questions you will find on the A2 Exam. A 25-question pre-test at the beginning of the text helps assess your areas of strength and weakness before using the text. A 50-question comprehensive post-test at the back of the text includes rationales for correct and incorrect answers. Easy-to-read format with consistent section features (introduction, key terms, chapter outline, and a bulleted summary) help you organize your review time and understand the information. NEW! Updated, thoroughly reviewed content helps you prepare to pass the HESI Admission Assessment Exam. NEW! Comprehensive practice exams with over 200 questions on the Evolve companion site help you become familiar with the types of test questions.

General & Inorganic Chemistry Vol 1 R.Sarkar

Pediatric Resuscitation Stephen M. Schexnayder 2008 Pediatric Resuscitation is reviewed in this issue of Pediatric Clinics of North America, guest edited by Drs. Steve Schexnayder and Arno Zaritsky. Authorities in the field have come together to pen articles on Background and Epidemiology; CPR - Why the New Emphasis?; Airway Management; Arrhythmias, Cardioversion, and Defibrillation; Vascular Access and Medications; Medical Emergency Teams; Teamwork in Resuscitation; Resuscitation Education; Outcome Following Cardiac Arrest; Extracorporeal Life Support during CPR; Post-resuscitation Care; and Future Directions.

Literacy in the New Media Age Gunther R. Kress 2003 This important and influential book considers how the Internet, like the printing press in its time, has changed the politics of communication and explores how the changes will affect the future of literacy.

Pediatric Emergency Assessment, Recognition, and Stabilization Frank X. Doto 2007 Instructor CD contents include: Precourse materials -- Course materials -- Evaluation materials -- Resources.

Action Research in Teaching and Learning Lin Norton 2018-11-02 Practical and down-to-earth, the second edition of Action Research in Teaching and Learning is an ideal introduction to the subject, offering a distinctive blend of the theoretical and the practical, grounded firmly in the global higher education landscape. Written in an

accessible style to build confidence, it provides easily adaptable, practical frameworks, guidelines and advice on research practice within a higher education context. The reader is guided through each stage of the action research process, from engaging with the critical theory, to the practical applications with the ultimate goal of providing a research study which is publishable. Supplemented by useful pedagogical research tools and exemplars of both qualitative and quantitative action research studies, this new edition features chapters engaging with teaching excellence and analysing qualitative and quantitative research, additions to the resources section and a new preface focusing more explicitly on the ever-growing number of part-time academics. Action Research in Teaching and Learning combines a theoretical understanding of the scholarly literature with practical applications and is an essential, critical read for any individual teaching or undertaking action research.

E-learning Methodologies Beatrice Ghirardini 2011 The "E-Learning Methodologies" guide will support professionals involved in the design and development of e-learning projects and products. The guide reviews the basic concepts of e-learning with a focus on adult learning, and introduces the various activities and roles involved in an e-learning project. The guide covers methodologies and tips for creating interactive content and for facilitating online learning, as well as some of the technologies used to create and deliver e-learning.

Staying Or Leaving the Course Veronica McGivney 2003 Are participation policies having a detrimental effect on retention and completion rates? This work explores the challenges of retention and non-completion rates in higher education and the implications of having an expanding and diverse student population. It investigates the nature of mature student withdrawal and explores the reasons behind it.

McGraw-Hill's Conquering SAT Math, 2nd Ed. Robert Postman 2007-07-11 The authors are experts in test preparation with extensive classroom experience in teaching SAT math. Includes crucial strategies for using calculators to solve problems efficiently Gives students five sample SAT math sections with complete solutions for every question **Information Systems Foundations** Dennis Hart 2010-12-01 This volume presents papers from the fourth biennial Information Systems Foundation Workshop, held at The Australian National University in Canberra from 2i3 October, 2008. The focus of the workshop was, as for the others in the series, the foundations of Information Systems as an academic discipline. The emphasis in this workshop was on the movement known as 'Design Science' and its importance in practical disciplines such as Information Systems. The chapters in the volume provide a critical examination of current design science ideas, with the role of human creativity given special mention. The philosophical underpinnings of design science thinking are also examined. Practically, the volume shows how the design science approach can be used in academic research that leads to artefacts that add value for individuals, organizations and society.

Machine Scoring of Student Essays Patricia Freitag Ericsson 2006-03-15 The current trend toward machine-scoring of student work, Ericsson and Haswell argue, has created an emerging issue with implications for higher education across the disciplines, but with particular importance for those in English departments and in administration. The academic community has been silent on the issue--some would say excluded from it--while the commercial entities who develop essay-scoring software have been very active. Machine Scoring of Student Essays is the first volume to seriously consider the educational mechanisms and consequences of this trend, and it offers important discussions from some of the leading scholars in writing assessment. Reading and evaluating student writing is a time-consuming process, yet it is a vital part of both student placement and coursework at post-secondary institutions. In recent years, commercial computer-evaluation programs have been developed to score student essays in both of these contexts. Two-year colleges have been especially drawn to these programs, but four-year institutions are moving to them as well, because of the cost-savings they promise. Unfortunately, to a large extent, the programs have been written, and institutions are installing them, without attention to their instructional validity or adequacy. Since the education software companies are moving so rapidly into what they perceive as a promising new market, a wider discussion of machine-scoring is vital if scholars hope to influence development and/or implementation of the programs being created. What is needed, then, is a critical resource to help teachers and administrators evaluate programs they might be considering, and to more fully envision the instructional consequences of adopting them. And this is the resource that Ericsson and Haswell are providing here.

ACLS Review Made Incredibly Easy LWW 2017-01-26 CLS Review Made Incredibly Easy!® gives you the confidence you need to pass the ACLS certification exam as well as the knowledge and skills needed to perform advanced cardiac life support. Packed with easy-to-remember definitions and step-by-step directions on the latest treatment algorithms, this enjoyable review text tackles required ACLS course and exam content. The Pediatric Procedural Sedation Handbook Associate Professor of Anesthesiology and Pediatrics Cheryl K Gooden 2018-11-16 The Pediatric Procedural Sedation Handbook provides a comprehensive but concise review of the essential information needed to allow for the safe practice of pediatric procedural sedation. Written by a group of multidisciplinary authors, this text explores the fundamentals of sedation, procedural sedation, special patient considerations, diagnostic and therapeutic procedures, and more. Each chapter offers a starting point and suggestions for further in-depth study of all aspects of providing safe, effective, multidisciplinary-team based sedation care for children undergoing testing and procedures outside of an operating room setting. Appendices providing medication dosing and delivery route suggestions complement the text and can be used for quick reference. This book is a must-read for any clinician involved in modern, team-based patient-centered care, including physicians, nurses, dentists, and child life specialists. Editors and authors are members of the Society of Pediatric Sedation, a multidisciplinary society dedicated to the advance of pediatric sedation by promoting safe, high quality care, innovative research, and quality professional education.

Pediatric Education for Prehospital Professionals American Academy of Pediatrics 2006 Pediatric Education for Prehospital Professionals (PEPP) represents a comprehensive source of prehospital medical information for the emergency care of infants and children.

Foreign Language Learning with Digital Technology Michael Evans 2009-02-07 While digital technology is endlessly innovating and improving itself as a tool to support teaching and learning, the cognitive process of language learning itself remains perennially the same. However, digital technology has created new learning opportunities and introduces new elements into the cognitive process of foreign language learning. The contributors of this well-edited collection examine foreign language learning primarily from a user perspective and explore these underlying questions: How does digital technology support existing foreign language learning needs and processes? What new learning experiences does it entail for the learner? The book situates new insights into the value of digital technology for foreign language learning within the context of evidence from prior research and of educational policy-making and examines key pedagogical uses of digital technology in relation to effective foreign language learning by pupils. It provides an in-depth description of the use of a range of digital media and combines practical ideas for teaching and learning with critical analysis of evidence drawing on an analysis of technology-focused language learning across different sectors and in different anglophone contexts.
