It explores curriculums from three unique perspectives-cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). ### **Pain Management and the Opioid Epidemic**

National Academies of Sciences, Engineering, and Medicine 2017-09-28 Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms

that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

*Knowing What Students Know* National Research Council 2001-10-27 Education is a hot topic. From the stage of presidential debates to tonight's dinner table, it is an issue that most Americans are deeply concerned about. While there are many strategies for improving the educational process, we need a way to find out what works and what doesn't work as well. Educational assessment seeks to determine just how well students are learning and is an integral part of our quest for improved education. The nation is pinning greater expectations on educational assessment than ever before. We look to these assessment tools when documenting whether students and institutions are truly meeting education goals. But we must stop and ask a crucial question: What kind of assessment is most effective? At a time when traditional testing is subject to increasing criticism, research suggests that new, exciting approaches to assessment may be on the horizon. Advances in the sciences of how people

learn and how to measure such learning offer the hope of developing new kinds of assessments—assessments that help students succeed in school by making as clear as possible the nature of their accomplishments and the progress of their learning. *Knowing What Students Know* essentially explains how expanding knowledge in the scientific fields of human learning and educational measurement can form the foundations of an improved approach to assessment. These advances suggest ways that the targets of assessment—what students know and how well they know it—as well as the methods used to make inferences about student learning can be made more valid and instructionally useful. Principles for designing and using these new kinds of assessments are presented, and examples are used to illustrate the principles. Implications for policy, practice, and research are also explored. With the promise of a productive research-based approach to assessment of student learning, *Knowing What Students Know*

*The Cannibal Queen* Stephen Coonts 2010-11-30

The New York Times–bestselling icon of the techno-aviation thriller takes to the skies in this memoir of a great American adventure in an open-cockpit biplane. It was a bird’s-eye view of America—and the trip of a lifetime for author Stephen Coonts and his fourteen-year-old son. But even for Coonts, who had clocked 1,600 hours as a naval aviator and was the recipient of the Distinguished Flying Cross commendation, this was a first. He’d be flying closer to the earth than he ever had before. His big yellow wood-and-canvas bird was the Cannibal Queen, a Stearman open-cockpit biplane built in 1942. Destined for the scrap yard, it was rescued and restored for what Coonts would call his “Stearman summer.” On a clear June afternoon in 1991, Coonts and his son took off to see the

country the same way the barnstormers flew their Jennys: with a map and a compass. Coonts followed highways, railroad lines, back roads, mountains, rivers, and landmarks. For the next three months, seeing old friends and meeting new ones, he touched down on the diverse landscapes of each of the forty-eight contiguous states to record the stories of the American countryside, its spirited people, and its rich history. Soaring from big cities to the heartland, experiencing everything from Bourbon Street jazz and small-town barbershop quartets to greasy spoons and backyard barbeques, the author of *Flight of the Intruder* and *The Art of War* captures not only the singular thrill of biplane aviation, but a nostalgia for the simple pleasures of an America thought lost and forgotten. Stephen Coonts found it, and in *The Cannibal Queen* he shares every exultant moment. This ebook features an illustrated biography of Stephen Coonts, including rare photos from the author's personal collection.

**Private Pilot Airman Certification Standards - Airplane**

Federal Aviation Administration (FAA)  
2016-09-25 The Federal Aviation Administration (FAA) has published the Private Pilot - Airplane Airman Certification Standards (ACS) document to communicate the aeronautical knowledge, risk management, and flight proficiency standards for the private pilot certification in the airplane category, single-engine land and sea; and multiengine land and sea classes. This ACS incorporates and supersedes the previous Private Pilot Practical Test Standards for Airplane, FAA-S-8081-14. The FAA views the ACS as the foundation of its transition to a more integrated and systematic approach to airman certification. The ACS is part of the safety management

system (SMS) framework that the FAA uses to mitigate risks associated with airman certification training and testing. Specifically, the ACS, associated guidance, and test question components of the airman certification system are constructed around the four functional components of an SMS: Safety Policy that defines and describes aeronautical knowledge, flight proficiency, and risk management as integrated components of the airman certification system; Safety Risk Management processes through which internal and external stakeholders identify and evaluate regulatory changes, safety recommendations and other factors that require modification of airman testing and training materials; Safety Assurance processes to ensure the prompt and appropriate incorporation of changes arising from new regulations and safety recommendations; and Safety Promotion in the form of ongoing engagement with both external stakeholders (e.g., the aviation training industry) and FAA policy divisions. The FAA has developed

this ACS and its associated guidance in collaboration with a diverse group of aviation training experts. The goal is to drive a systematic approach to all components of the airman certification system, including knowledge test question development and conduct of the practical test. The FAA acknowledges and appreciates the many hours that these aviation experts have contributed toward this goal. This level of collaboration, a hallmark of a robust safety culture, strengthens and enhances aviation safety at every level of the airman certification system.

Throughout, the text demonstrates that academic processes are recursive, and the structure of the text reflects this recursivity: as students move from the early chapters to the workshop chapters, they build upon earlier learning, digging deeper into the material and gaining confidence along the way.
