Responding to Rapid Change in Libraries Callan Bignoli 2020-11-10 In the face of rapid change and an ever-widening constellation of challenges, it's crucial for library leaders to pull back to the question of "why?" Plotting a sustainable way forward depends upon recommitting ourselves to our underlying values, such as customer service and community-building, while fostering the improvements that change makes possible. With passion, patience, and fortitude, libraries can stride confidently into the future. In this book, noted speakers and consultants Bignoli and Stara speak directly to library directors, managers, administrators, and technology staff, offering concrete guidance on setting or resetting strategic priorities. Taking an interconnected and specific approach to planning for and strengthening the library environment as a whole, their book – discusses why libraries should embrace change as a fundamental part of library life; – explores how to harness rapid change to provide more responsive, user-centered library service; – addresses the ways in which libraries straddle the physical and the digital, in areas such as service provision and collections, illuminating how they overlap and can be improved using similar philosophies; – presents both a comprehensive overview of library technologies as well as related team and change management advice, all grounded in user experience principles; – shows how the concepts of sustainability and flexibility apply to physical space planning and design, from furniture selection and arrangement to infrastructure; and – provides sound guidance on project management, problem solving, preparing for future challenges, personal reflection and self-care, and other leadership topics.

Learning styles in education and training 2006 The application of learning styles theory and research continues to hold great promise for practitioners in both education and training as a potentially powerful mechanism for enabling pupils, students and trainees to better manage their own learning throughout their educational and working lives. The selection of papers from the 10th annual European Learning Styles Information Network conference (held in July 2005 at the School of Management, University of Surrey) presented here raise a number of pertinent issues which are significant in the on-going debate regarding the value of cognitive a.

Self-directed Learning Oriented Assessments in the Asia-Pacific Magdalena Mo Ching Mok 2012-10-09 The Asia-Pacific region needs to maximize the benefits of education to enable it to compete in an economic future dominated by innovation, in which assessing student progress must be an empowering rather than delimiting factor. This detailed exposition of the theoretical basis and application tools of self-directed learning-oriented assessment (SLOA) reflects the very latest research championed by the Assessment Research Centre at The Hong Kong Institute of Education. Featuring a range of relevant case studies, it explores the varied theoretical issues related to SLOA and offers an integrated view of the system fully in line with the constructivist paradigm of learning which advocates formative rather than summative assessment. Many of the initiatives outlined here are firsts in the region. SLOA is already being applied in many schools with links to the ARC. It is an approach to assessment that acknowledges the centrality of self-directed learning and which positions assessment as a tool to enable and enhance self-directed learning. It draws on several theories of learning and assessment, including the constructivist notion that learning is best achieved when students take ownership of their educational process, setting their own goals and monitoring their own progress towards those goals. SLOA has been the research and service approach of the ARC since 2005. In the intervening years the centre has developed a number of tools to facilitate SLOA learning and assessment, including vertical ability scales, teacher-friendly computer software and packages for self-directed learning.

CISSP Training Guide Roberta Bragg 2002 The CISSP (Certified Information Systems Security Professionals) exam is a six-hour, monitored paper-based exam covering 10 domains of information system security knowledge, each representing a specific area of expertise. This book maps the exam objectives and offers numerous features such as exam tips, case studies, and practice exams.
Award in Education and Training: Understanding and Using Inclusive Teaching and Learning Approaches in Education and Training Nabeel Zaidi 2015-04-12 This textbook provides you with all the up-to-date information you need to pass first time, since it focuses systematically on each of the assessment criteria in the unit. As a lecturer / trainer / tutor / assessor / curriculum manager, how do you ensure 1. that all individual learners' needs are identified and met effectively? 2. that full account is taken of disability and learning difficulties when preparing and delivering teaching, learning and assessment strategies? 3. that strategies applied to reduce the barriers to learning experienced by disabled learners and those with learning difficulties are legitimate and reasonable and do not provide them with an unfair advantage? 4. that the most appropriate teaching, learning and assessment methods are used?, and 5. that sessions are planned and delivered effectively (and evidenced accordingly as part of a MICRO-TEACH)? This textbook addresses each of these questions, with supporting research as needed, while remaining tightly focused on the unit's assessment criteria. Out of the three units of the Award in Education and Training, Understanding and Using Inclusive Teaching and Learning Approaches in Education and Training is probably the most demanding to understand and apply. What sets this book apart is the author's application of his considerable experience to this subject area in order to simplify it for those new to teaching and/or new to the subject. Whether you are delivering training or lectures to 16-18 year-olds, mature learners, professionals, managers or international students, with a range of learning needs and barriers to learning, this book will prove useful in preparing you not only for your unit assessment, but also for work in the sector. Most importantly, the book adopts a practical approach, which is supported by evidence and, where relevant, cross-referenced to Ofsted and QAA expectations. It is therefore suitable for those intending to enter teaching and training as well as those already involved in delivering or managing a programme. Understanding and Using Inclusive Teaching and Learning Approaches in Education and Training is the second book in the Award in Education and Training series and covers each aspect of the Award in Education and Training (AET) unit of the same name. Like the first book on Understanding Roles, Responsibilities and Relationships in Education and Training, this book is mapped directly to each of the learning outcomes and assessment criteria for the unit across all awarding organisations. It provides detailed practical explanation and links to various other resources so that whether you are new to teaching or already in a teaching or related role, there will be a detailed examination of inclusive teaching and learning approaches in education and training. People purchasing this book may find it useful to have a copy of the first book in the series (Understanding Roles, Responsibilities and Relationships in Education and Training) as background. Books available in the Award in Education and Training series: 1. Understanding Roles, Responsibilities and Relationships in Education and Training (Book 1) 2. Understanding and Using Inclusive Teaching and Learning Approaches in Education and Training (Book 2) 3. Understanding Assessment in Education and Training (Book 3) (coming soon) More in-depth reading relevant to this publication: 1. Equality and

Diversity: Embedding Equality and Diversity into the Curriculum – a literature review 2. Micro-teach Masterclass: Preparing and delivering your micro-teach for the Award in Education and Training and for interviews in teaching

Achieving your Award in Education and Training (AET): The Comprehensive Course Companion Nabeel Zaidi 2015-05-14 THIS TEXTBOOK PROVIDES ALL THE UP-TO-DATE INFORMATION YOU NEED TO PASS YOUR COURSE, COMMUNICATED IN A USER-FRIENDLY AND PRACTICAL MANNER The Award in Education and Training is the entry qualification for teaching in a range of learning contexts across the further education and skills sector. It comprises three units, which are fully covered by this textbook. These are as follows: Understanding Roles, Responsibilities and Relationships in Education and Training Understanding and Using Inclusive Teaching and Learning Approaches in Education and Training Understanding Assessment in Education and Training This textbook is written for all awarding organisations and assessment criteria of these three units, provides examples of current practice in the sector and adopts a user-friendly approach to explaining concepts and principles. It is therefore essential reading for anyone hoping to pass the Award in Education and Training, as well as gaining a fuller appreciation of the subject and practice in the sector. The author provides a range of professional perspectives when examining topics, which should prove useful for the course and also in preparing to enter the sector. He draws on his extensive experience as a lecturer, senior manager, educational consultant and on his work with external bodies, such as the Quality Assurance Agency (QAA) as a Reviewer and awarding organisations as an Examiner, Standards Verifier and Centre Quality Reviewer. This experience ensures the currency and relevance of the examples used in this textbook. The principal benefits to the reader of this textbook are as follows: It is written by an experienced practitioner with extensive experience across the further education and skills sector, occupying a variety of roles; It adopts a practical approach to topics, reflecting current practice in the sector; It is clearly written and easy to understand; It fully addresses each of the learning outcomes and assessment criteria in a systematic way, which makes completing the course and assessments in a short timeframe achievable; It provides a broader range of information and examples, which should prove useful when preparing to enter the sector, such as attending job interviews for teaching related posts. This textbook has the following unique feature It is regularly updated by the author, taking account of the latest changes in the further education and skills sector; The following textbooks complement this textbook: Meeting the Assessment Requirements of the Award in Education and Training (This textbook provides detailed guidance on how to structure responses to assessment tasks.) Micro-teach Masterclass: Preparing and delivering your micro-teach for the Award in Education and Training and for interviews in teaching (This textbook provides a comprehensive step-by-step approach to researching, planning, delivering and evaluating your micro-teach. It is suitable for individuals who desire a detailed understanding of the processes involved in micro-teaching, the practices in the sector, cross-referenced to the new Ofsted common inspection framework 2015, professional standards and the SEND code of practice; it is also relevant to individuals who are preparing for teaching and training related job interviews.) Please note that the Pdf / "scanned pages" version of this textbook is identical to the print version of the textbook, including content and page numbers, which will make it easier to cite. If you would like a print version of the textbook, you can order it through Createspace (https://www.createspace.com/5484685). Prices are quoted in USA Dollars, but shipment is in the UK and tends to be very prompt. Alternatively, you can purchase it from Amazon (http://www.amazon.co.uk/Achieving-your-Award-Education-Training/dp/1512095273/), which sources it from Createspace.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
