Nationalism and Hegemony Michaelangelo Anastasiou 2022-04-15 This book develops a contemporary theory of nationalism that addresses 21st century political challenges, exploring theoretical and empirical understandings of the concepts of 'the nation' and 'nationalism' and the failure of various theoretical accounts to decipher the diverse manner by which nationalism comes to be embedded in our social and political world. Accounting for the dynamism and 'intertextuality' of nationalism, Nationalism and Hegemony shows how 'the nation' and 'nationalism' come to be consolidated as conceptual and experiential power structures and how the interests of political groups are advanced through diverse nationalist modalities, which can at any time be activated for political purposes. A critique of the various and diverse manifestations of nationalism, this contribution to both theory and political practice will appeal to scholars working in the fields of sociology and social and political theory.

Introduction to Sociology Brij Mohan 2022-06-28 This textbook explores the emergence of sociology as a distinct social science. Focusing on the evolution of social theories, movements and ideas through history, it analyses the

dynamic relationship between the individual and the larger social forces around them. This volume examines the definitive aspects of societies, communities and social groups, and their intersections with culture, political and economic movements and religious institutions. It establishes the connections between sociology and other disciplines such as philosophy, history, political science, economics, psychology and anthropology to explore the interdependence between different realms of social life. The chapters in this book explain and highlight the significance of quantitative and qualitative methods of research in understanding the dynamics of social life. Drawing from the works of classical social theorists such as Auguste Comte, Herbert Spencer, Karl Marx, Emile Durkheim and Max Weber, this book traces the development of sociological perspectives and theories and their relevance in the history of ideas. Lucid and comprehensive, this textbook will be useful for undergraduate and postgraduate students of sociology, development studies, history of ideas, sociological thought, social theory, research methods, political science and anthropology.

Men's Health Equity Derek M. Griffith 2019-04-25 Worldwide, men have more opportunities, privileges, and power, yet they also have shorter life expectancies than women. Why is this? Why are there stark differences in the burden of disease, quality of life, and length of life amongst men, by race, ethnicity, (dis)ability status, sexual orientation, gender identity, rurality, and national context? Why is this a largely unexplored area of research? *Men's Health Equity* is the first volume to describe men's health equity as a field of study that emerged from gaps in and between research on men's health and health inequities. This handbook provides a comprehensive review of foundations of the field; summarizes the issues unique to different populations; discusses key frameworks for studying and exploring issues that cut across populations in the United States, Australia, Canada, the United Kingdom, Central America, and South America; and offers strategies for improving the health of key population groups and achieving men's health equity overall. This book systematically explores the underlying causes of these differences, describes the specific challenges faced by particular groups of men, and offers policy and programmatic strategies to improve the health and well-being of men and pursue men's health equity. *Men's Health Equity* will be the first collection to present the state of the science in this field, its progress, its breadth, and its future. This book is an invaluable resource for scholars, researchers, students, and professionals interested in men's health equity, men's health, psychology of men's health, gender studies, public health, and

global health.

The SAGE Encyclopedia of Intercultural Competence Janet M. Bennett 2015-03-23 In 1980, SAGE published Geert Hofstede’s *Culture’s Consequences*. It opens with a quote from Blaise Pascal: “There are truths on this side of the Pyrenees that are falsehoods on the other.” The book became a classic—one of the most cited sources in the Social Science Citation Index—and subsequently appeared in a second edition in 2001. This new SAGE Encyclopedia of Intercultural Competence picks up on themes explored in that book. Cultural competence refers to the set of attitudes, practices, and policies that enables a person or agency to work well with people from differing cultural groups. Other related terms include cultural sensitivity, transcultural skills, diversity competence, and multicultural expertise. What defines a culture? What barriers might block successful communication between individuals or agencies of differing cultures? How can those barriers be understood and navigated to enhance intercultural communication and understanding? These questions and more are explained within the pages of this new reference work. Key Features: 300 to 350 entries organized in A-to-Z fashion in two volumes Signed entries that conclude with Cross-References and Suggestions for Further Readings Thematic “Reader’s Guide” in the front matter grouping related entries by broad topic areas Chronology that provides a historical perspective of the development of cultural competence as a discrete field of study Resources appendix and a comprehensive Index The SAGE Encyclopedia of Intercultural Competence is an authoritative and rigorous source on intercultural competence and related issues, making it a must-have reference for all academic libraries.

Politics and Economics) * 315 entirely new references and 120 new photos. *Decolonising Science, Technology, Engineering and Mathematics (STEM) in an Age of Technocolonialism* Nhemachena, Artwell 2020-03-02 Positioning the notions of coloniality of ignorance and geopolitics of ignorance as central to coloniality and colonisation, this book examines how colonialists socially produced ignorance among colonised indigenous peoples so as to render them docile and manageable. Dismissing colonial descriptions of indigenous people as savages, illiterate, irrational, prelogical, mystical, primitive, barbaric and backward, the book argues that imperialists/colonialists contrived geopolitics of ignorance wherein indigenous regions were forced to become ignorant, hence containable and manageable in the imperial world. Questioning the provenance of modernist epistemologies, the book asks why Eurocentric scholars only contest the provenance of indigenous knowledges, artefacts and scientific collections. Interrogating why empire sponsors the decolonisation of universities/epistemologies in indigenous territories while resisting the repatriation/restitution of indigenous artefacts, the book also wonders why Westerners who still retain indigenous artefacts, skulls and skeletons in their museums, universities and private collections do not consider such artefacts and skulls to be colonising them as well. The book is valuable to scholars and activists in the fields of anthropology, museums and heritage studies, science and technology studies, decoloniality, policymaking, education, politics, sociology and development studies.

Gambling, Losses and Self-Esteem Cormac Mc Namara 2019-12-10 This book provides new insights into contemporary betting shops, with a particular focus on the manner in which losing bets are dealt with by customers. Drawing on research undertaken in Ireland, it demonstrates that customers tend to shift responsibility for monetary losses onto factors external to themselves as part of a collective process engaged in to restore self-esteem,

and considers the role played by announcements made in betting shops in creating an atmosphere of inclusion - and the implications of this for 'problem gambling'. Through an analysis of newspaper representations of the first legally operating betting shops in Ireland, which opened in the 1920s, the author places the contemporary betting shop in historical context and examines trends in gambling across the British Isles with reference to social class and the security or precarity of work. An interactionist study not only of gambling but also of responsibility and the connection between the micro-world and social structures, this volume will appeal to sociologists with interests in symbolic interactionism and strategies of blame.

Gods in the Global Village Lester R. Kurtz 2011-12-01 In an era plagued by religious conflict, the Third Edition of *Gods in the Global Village* directly responds to issues of social problems prevalent in the world today. Using an engaging, thought-provoking style, author Lester R. Kurtz focuses on the relationship among the major faith traditions that inform the thinking and ethical standards of most people in the emerging global social order. This book focuses on a central aspect of that common crisis. A major assumption of this book is that all knowledge is shaped by the social context of the knower; therefore, both religious traditions and our studies of them are shaped by the context in which we construct them. The author argues that religious pluralism will be a necessary precondition of the global village for the foreseeable future. The question that faces us as a human community is not "Which religious tradition is true?" or even "Is any religious tradition true?" but rather "How can we enable the various religious and secular traditions to coexist peacefully on the planet?" The text supports the belief that the sociology of religion—itsself a pluralistic discipline—can provide invaluable insight into the most pressing problems of our time.
