Uprooted D. Ryan Gray 2020-02-11 "This book is an archaeological investigation of four New Orleans neighborhoods that were replaced by public housing projects around World War II. Each of these neighborhoods was identified as a "slum" historically, but the material record challenges the simplicity of this designation. Gray provides evidence of the inventiveness of former residents who were marginalized by class, color, or gender, whose everyday strategies of survival, subsistence, and spirituality challenged the city's developing racial and social hierarchies. Slum clearance at the national scale was a form of erasure, in which whole neighborhoods and their all-too-complicated realities were obliterated from the built environment of cities across the United States. In New Orleans, from the St. Thomas Housing Project, which replaced the working-class riverfront Irish Channel, to Iberville, constructed over what remained of the Storyville red light district, the logics of clearance inevitably revolved around the complexities of race. This work uses both documents and archaeological data to examine what this entailed at a variety of scales, reconstructing narratives of the households and communities affected by clearance. Public housing, both in New Orleans and elsewhere, imposed a new kind of control on urban life that had the effect of making cities both more segregated and more

unequal. The story of the neighborhoods that were destroyed provides a reminder that this was not an inevitable outcome, and that a more equitable and just city is still possible today"--

Katrina Andy Horowitz 2020-06-16 The definitive history of Katrina: an epic of citymaking, revealing how engineers and oil executives, politicians and musicians, and neighbors black and white built New Orleans, then watched it sink under the weight of their competing ambitions. Hurricane Katrina made landfall in New Orleans on August 29, 2005, but the decisions that caused the disaster extend across the twentieth century. After the city weathered a major hurricane in 1915, its Sewerage and Water Board believed that developers could safely build housing away from the high ground near the Mississippi. And so New Orleans grew in lowlands that relied on significant government subsidies to stay dry. When the flawed levee system surrounding the city and its suburbs failed, these were the neighborhoods that were devastated. The homes that flooded belonged to Louisianans black and white, rich and poor. Katrina's flood washed over the twentieth-century city. The flood line tells one important story about Katrina, but it is not the only story that matters. Andy Horowitz investigates the response to the flood, when policymakers reapportioned the challenges the water posed, making it easier for white New Orleanians to return home than it

was for African Americans. And he explores how the profits and liabilities created by Louisiana's oil industry have been distributed unevenly among the state's citizens for a century, prompting both dreams of abundance—and a catastrophic land loss crisis that continues today. Laying bare the relationship between structural inequality and physical infrastructure—a relationship that has shaped all American cities—Katrina offers a chilling glimpse of the future disasters we are already creating.

New Orleans Noir Julie Smith 2016-02-16 "Explores the dark corners of our city . . . set both pre- and post-Katrina . . . harrowing reading, to be sure, but it's pure page-turning pleasure, too." —The Times-Picayune Residents of the Big Easy are proud of its unique history and character. Resourceful and resilient, they are survivors—of natural disasters, as well as everyday tragedies. For off the beaten path, where tourists never travel, is a city that revels in scandal, sin, and seduction. *New Orleans Noir* includes stories by Ace Atkins, Laura Lippman, Patty Friedmann, Barbara Hambly, Tim McLoughlin, Olympia Vernon, David Fulmer, Jervey Tervalon, James Nolan, Kalamu ya Salaam, Maureen Tan, Thomas Adcock, Jeri Cain Rossi, Christine Wiltz, Greg Herren, Julie Smith, Eric Overmyer, and Ted O'Brien. "A vivid series of impressions of the city in moments that brought out either the best or worst in people . . . a thrilling read and a harbinger of what should be an interesting stream of

works." —Gambit Weekly "When you've waded through these anguished pages, you can begin to understand why—as corrupt as it is, as broken as it is—so many of New Orleans's refugees still long to go home."

—Mystery Scene "Excellent . . . Appropriately, Smith divides the book into pre- and post-Katrina sections, and many of the more powerful tales describe the disaster's hellish aftermath." —Publishers Weekly

Delta Urbanism: New Orleans Richard Campanella 2017-11-08 This volume of APA's Delta Urbanism series traces the development of New Orleans from precolonial times to post-Katrina realities, in the context of the deltaic plain on which it lies. The book describes the underlying physical terrain and covers the various transformations humans have made to it: site selection, settlement, urbanization, population, expansion, drainage, protection, exploitation, devastation, and recovery. What New Orleans has experienced foretells what similar cities will be tackling in years to come.

Remediating Region Gina Caison 2021-12-08 Rather than a media history of the region or a history of southern media, *Remediating Region: New Media and the U.S. South* formulates a critical methodology for studying the continuous reinventions of regional space across media platforms. This innovative collection demonstrates that structures of media undergird American regionalism through the representation of a given geography's peoples, places, and ideologies. It also outlines how the region answers back to the national media by circulating ever-shifting ideas of place via new platforms that allow for self-representation outside previously sanctioned media forms. *Remediating Region* recognizes that all media was once new media. In examining how changes in information and media modify concepts of region, it both articulates the virtual realities of the twenty-first-century U.S. South and historicizes the impact of "new" media on a region that has long been mediated. Eleven essays examine media moments ranging from the nineteenth century to the present day, among them Frederick Douglass's utilization of early photography, video game representations of a late capitalist landscape, rural queer communities' engagement with social

media platforms, and contemporary technologies focused on revitalizing Indigenous cultural practices. Interdisciplinary in scope and execution, Remediating Region argues that on an increasingly networked planet, concerns over the mediated region continue to inform how audiences and participants understand their entrée into a global world through local space.

The Fight for Home Daniel Wolff 2012-08-07 When Daniel Wolff first headed down to New Orleans five months after the levees breached, he thought he might spend a year reporting on the recovery ahead. He found people desperate to tell their stories; they had lost the documents of their personal history - the photos and diaries - in the flood. They wanted to recover and preserve their stories through telling, and as their recovery dragged on and they struggled to make their government keep its promises, they became desperate about the recorders and cameras turning away. A year of reporting became five. Wolff follows the inevitable difficulties of rebuilding a city almost from scratch. A quarter of the population chose not to return; those who did had to rebuild not just houses but community. The city of their memory, their model, had one of the worst crime rates and worst school systems in the country; yet an organized plan for a brighter future might eliminate the very neighborhoods they had returned to fight for. The government was incompetent; the contractors were corrupt. In this environment, trust becomes a radical act and hope is its own small miracle. *The Fight for Home* introduces an amazing cast of characters: ex-addicts and church women, ex-Black Panthers and Sons of the Confederacy; urban planners and anarchists. As their journeys unfold, *Fight for Home* becomes a story of surviving not just a flood, but the emergency of the everyday - of surviving in America.

The Inevitable City Scott Cowen 2014-06-10 After seven years of service as the president of Tulane University, Scott Cowen watched the devastation of his beloved New Orleans at the hands of Hurricane Katrina. When federal, state, and city officials couldn't find their way to decisive action, Cowen, known for his gutsy leadership, quickly partnered with a coalition of civic, business, and nonprofit leaders

looking to work around the old institutions to revitalize and transform New Orleans. This team led the charge to restore equilibrium and eventually to rebuild. For the past nine years, Cowen has continued this work, helping to bring the city of New Orleans back from the brink. *The Inevitable City* presents 10 principles that changed the game for this city, and, if adopted, can alter the curve for any business, endeavor, community—and perhaps even a nation. This is the story of the resurgence and reinvention of one of America's greatest cities. Ordinary citizens, empowered to actively rescue their own city after politicians and government officials failed them, have succeeded in rebuilding their world. Cowen was at the leading edge of those who articulated, shaped, and implemented a vision of transformative change that has yielded surprising social progress and economic growth: a drowned city identified with the shocking images of devastation and breakdown has transformed itself into a mecca of growth, opportunity, and hope.

The Economic Impacts of Natural Disasters Debarati Guha-Sapir 2013-05-23 *The Economic Impacts of Natural Disasters* focuses on concerns of poverty and vulnerability amongst natural disaster zones. Written by a collection of scholars in disaster management and sustainable development, the report provides an overview of the general trends in natural disasters and their effects by focusing on a critical analysis of different methodologies used to assess the economic impact of natural disasters.

Song for My Fathers Tom Sancton 2010-04-20 *Song for My Fathers* is the story of a young white boy driven by a consuming passion to learn the music and ways of a group of aging black jazzmen in the twilight years of the segregation era. Contemporaries of Louis Armstrong, most of them had played in local obscurity until Preservation Hall launched a nationwide revival of interest in traditional jazz. They called themselves "the mens." And they welcomed the young apprentice into their ranks. The boy was introduced into this remarkable fellowship by his father, an eccentric Southern liberal and failed novelist whose powerful articles on race had made him one of the most effective polemicists of the early Civil

Rights movement. Nurtured on his father's belief in racial equality, the aspiring clarinetist embraced the old musicians with a boundless love and admiration. The narrative unfolds against the vivid backdrop of New Orleans in the 1950s and '60s. But that magical place is more than decor; it is perhaps the central player, for this story could not have taken place in any other city in the world.

After Katrina Anna Hartnell 2017-01-25 Argues that post-Katrina New Orleans is a key site for exploring competing narratives of American decline and renewal at the beginning of the twenty-first century.

Through the lens provided by the tenth anniversary of Hurricane Katrina, *After Katrina* argues that the city of New Orleans emerges as a key site for exploring competing narratives of US decline and renewal at the beginning of the twenty-first century. Deploying an interdisciplinary approach to explore cultural representations of the post-storm city, Anna Hartnell suggests that New Orleans has been reimagined as a laboratory for a racialized neoliberalism, and as such might be seen as a terminus of the American dream. This US disaster zone has unveiled a network of social and environmental crises that demonstrate that prospects of social mobility have dwindled as environmental degradation and coastal erosion emerge as major threats not just to the quality of life but to the possibility of life in coastal communities across America and the world. And yet *After Katrina* also suggests that New Orleans culture offers a way of thinking about the United States in terms that transcend the binary of national renewal or declension. The post-Hurricane city thus emerges as a flashpoint for reflecting on the contemporary United States.

New Orleans Mourning Julie Smith 1991 When the smiling King of Carnival is killed at Mardi Gras, policewoman Skip Langdon is on the case. Religion and the Rise of Jim Crow in New Orleans James B. Bennett 2016-06-28 Religion and the Rise of Jim Crow in New Orleans examines a difficult chapter in American religious history: the story of race prejudice in American Christianity. Focusing on the largest city in the late-nineteenth-century South, it explores the relationship between churches--black and white, Protestant and Catholic--and the emergence of the Jim Crow laws, statutes that created a racial caste system in the American South. The book fills a gap in the scholarship on religion and race in the crucial decades between the end of Reconstruction and the eve of the Civil Rights movement. Drawing on a range of local and personal accounts from the post-Reconstruction period, newspapers, and church records, Bennett's analysis challenges the assumption that churches fell into fixed patterns of segregation without a fight. In sacred no less than secular spheres, establishing Jim Crow constituted a long, slow, and complicated journey that extended well into the twentieth century. Churches remained a source of hope and a means of resistance against segregation, rather than a retreat from racial oppression. Especially in

the decade after Reconstruction, churches offered the possibility of creating a common identity that privileged religious over racial status, a pattern that black church members hoped would transfer to a national American identity transcending racial differences. Religion thus becomes a lens to reconsider patterns for racial interaction throughout Southern society. By tracing the contours of that hopeful yet ultimately tragic journey, this book reveals the complex and mutually influential relationship between church and society in the American South, placing churches at the center of the nation's racial struggles.

Delta Urbanism: The Netherlands Han Meyer 2017-11-08 Delta Urbanism is a major new initiative that explores the growth, development, and management of deltaic cities and regions, with the aim of balancing various goals in a sustainable manner: urbanization, port commerce, industrial development, flood defense, public safety, ecological balance, tourism, and recreation. This book is a detailed history and overview of how one low-lying country has developed the policies, tools, technology, planning, public outreach, and international cooperation needed to save their populated deltas.

Sula Toni Morrison 2007-07-24 From the acclaimed Nobel Prize winner: Two girls who grow up to become women. Two friends who become something worse than enemies. This brilliantly imagined novel brings us the story of Nel Wright and Sula Peace, who meet as children in the small town of Medallion, Ohio. Nel and Sula's devotion is fierce enough to withstand bullies and the burden of a dreadful secret. It endures even after Nel has grown up to be a pillar of the black community and Sula has become a pariah. But their friendship ends in an unforgivable betrayal—or does it end? Terrifying, comic, ribald and tragic, Sula is a work that overflows with life.

Development Drowned and Reborn Clyde Woods 2017-07-01 Development Drowned and Reborn is a “Blues geography” of New Orleans, one that compels readers to return to the history of the Black freedom struggle there to reckon with its unfinished business. Reading contemporary policies of abandonment against the grain, Clyde Woods explores how Hurricane Katrina brought long-standing structures of

domination into view. In so doing, Woods delineates the roots of neoliberalism in the region and a history of resistance. Written in dialogue with social movements, this book offers tools for comprehending the racist dynamics of U.S. culture and economy. Following his landmark study, *Development Arrested*, Woods turns to organic intellectuals, Blues musicians, and poor and working people to instruct readers in this future-oriented history of struggle. Through this unique optic, Woods delineates a history, methodology, and epistemology to grasp alternative visions of development. Woods contributes to debates about the history and geography of neoliberalism. The book suggests that the prevailing focus on neoliberalism at national and global scales has led to a neglect of the regional scale. Specifically, it observes that theories of neoliberalism have tended to overlook New Orleans as an epicenter where racial, class, gender, and regional hierarchies have persisted for centuries. Through this Blues geography, Woods excavates the struggle for a new society.

Positioning Markets and Governments in Public Management Levine, Helisse 2017-11-30 States and markets are integrated segments of government that rely on one another for efficient operation. Cooperatives in New Orleans Anne Gessler 2020-06-04 Cooperatives have been central to the development of New Orleans. Anne Gessler asserts that local cooperatives have reshaped its built environment by

changing where people interact and with whom, helping them collapse social hierarchies and envision new political systems. Gessler tracks many neighborhood cooperatives, spanning from the 1890s to the present, whose alliances with union, consumer, and social justice activists animated successive generations of regional networks and stimulated urban growth in New Orleans. Studying alternative forms of social organization within the city's multiple integrated spaces, women, people of color, and laborers blended neighborhood-based African, Caribbean, and European communal activism with international cooperative principles to democratize exploitative systems of consumption, production, and exchange. From utopian socialist workers' unions and Rochdale grocery stores to black liberationist theater collectives and community gardens, these cooperative entities integrated marginalized residents into democratic governance while equally distributing profits among members. Besides economic development, neighborhood cooperatives participated in heady debates over urban land use, applying egalitarian cooperative principles to modernize New Orleans's crumbling infrastructure, monopolistic food distribution systems, and spotty welfare programs. As Gessler indicates, cooperative activists deployed street-level subsistence tactics to mobilize continual waves of ordinary people seizing control over mainstream economic and political institutions.

2014-10-02 Recounts a famous kidnapping that took place in New Orleans in 1870, in which a seventeen-month-old white child was taken by two African-American women, and the resulting public hysteria that led to racial tensions, political divisions, and false accusations and arrests.

New Orleans Rhythm and Blues After Katrina Michael Urban 2016-04-08

Music, magic and myth are elements essential to the identities of New

Orleans musicians. The city's singular contributions to popular music around the world have been unrivaled; performing this music authentically requires collective improvisation, taking performers on sonorous sojourns in unanticipated, 'magical' moments; and membership in the city's musical community entails participation in the myth of New Orleans, breathing new life into its storied traditions. On the basis of 56 open-ended interviews with those in the city's musical community, Michael Urban discovers that, indeed, community is what it is all about. In their own words, informants explain that commercial concerns are eclipsed by the pleasure of playing in 'one big band' that disassembles daily into smaller performing units whose rosters are fluid, such that, over time, 'everybody plays with everybody'. Although Hurricane Katrina nearly terminated the city, New Orleans and its music—in no small part due to the sacrifices and labors of its musicians—have come back even stronger. Dancing to their own drum, New Orleanians again prove themselves to be admirably out of step with the rest of America.

Winnebagos on Wednesdays Scott Cowen 2018-02-20 Why a strong mission and inspired leadership are vital to the success of America's colleges and universities In 1998, soon after assuming the presidency of Tulane University, Scott Cowen was confronted with a setback. Despite an undefeated football season and putting the best financial deal on the table, Cowen was unable to retain the school's football coach. The coach wanted something the president didn't have—a football program so popular, as the coach put it, that fans would line up their Winnebagos on Wednesdays in anticipation of Saturday games. In that moment, Cowen improbably found himself in the entertainment business—and his university was deemed wanting. At a time when schools seem overrun by sports programs, spiraling costs, and absurd ranking systems, Winnebagos on Wednesdays argues that colleges and universities of all stripes and sizes can achieve their educational aims if they possess two things: visionary leadership and a strong mission. Cowen, named one of the nation's top university presidents by Time magazine in 2009, gives a behind-the-scenes look at the critical demands faced by many education

leaders. He profiles a range of situations, from how Diana Natalicio of the University of Texas at El Paso expanded a school serving a specific demographic into an academic powerhouse to how Michael Sorrell shifted Paul Quinn College's mission to urban entrepreneurship in order to save the institution. Cowen also draws from his own hard-won experiences, including the rebuilding of Tulane and New Orleans after Hurricane Katrina and the decision to maintain Tulane's football program. He shows how crucial choices in tough situations shape organizations, for better or ill. A sweeping overview of the higher education landscape, *Winnebagos on Wednesdays* demonstrates that the courage of transformative leadership is essential for colleges and universities to remain vital.

Triumph of the City Edward Glaeser 2011-02-10 Shortlisted for the Financial Times and McKinsey Best Book of the Year Award in 2011 “A masterpiece.” —Steven D. Levitt, coauthor of *Freakonomics* “Bursting with insights.” —The New York Times Book Review A pioneering urban economist presents a myth-shattering look at the majesty and greatness of cities America is an urban nation, yet cities get a bad rap: they're dirty, poor, unhealthy, environmentally unfriendly . . . or are they? In this revelatory book, Edward Glaeser, a leading urban economist, declares that cities are actually the healthiest, greenest, and richest (in both cultural and economic terms) places to live. He travels through history and around the globe to reveal the hidden workings of cities and how they bring out the best in humankind. Using intrepid reportage, keen analysis, and cogent argument, Glaeser makes an urgent, eloquent case for the city's importance and splendor, offering inspiring proof that the city is humanity's greatest creation and our best hope for the future.

Remaking New Orleans Thomas Jessen Adams 2019-05-17 Approached as a wellspring of cultural authenticity and historical exceptionality, New Orleans appears in opposition to a nation perpetually driven by progress. *Remaking New Orleans* shows how this narrative is rooted in a romantic cultural tradition, continuously repackaged through the twin engines of tourism and economic development, and supported by research that has

isolated the city from comparison and left unquestioned its entrenched inequality. Working against this feedback loop, the contributors place New Orleans at the forefront of national patterns of urban planning, place-branding, structural inequality, and racialization. Nontraditional sites like professional wrestling matches, middle-class black suburbs, and Vietnamese gardens take precedence over clichéd renderings of Creole cuisine, voodoo queens, and hot jazz. Covering the city's founding through its present and highlighting changing political and social formations, this volume remakes New Orleans as a rich site for understanding the quintessential concerns of American cities.

The Great Deluge Douglas Brinkley 2009-10-13 In the span of five violent hours on August 29, 2005, Hurricane Katrina destroyed major Gulf Coast cities and flattened 150 miles of coastline. But it was only the first stage of a shocking triple tragedy. On the heels of one of the three strongest hurricanes ever to make landfall in the United States came the storm-surge flooding, which submerged a half-million homes—followed by the human tragedy of government mismanagement, which proved as cruel as the natural disaster itself. In *The Great Deluge*, bestselling author Douglas Brinkley finds the true heroes of this unparalleled catastrophe, and lets the survivors tell their own stories, masterly allowing them to record the nightmare that was Katrina.

Rise Up! Connie Marie Harris 2016-04-28 The never before told true story of a group of multi-racial, multi-denominational pastors in a Katrina-ravaged New Orleans. Not unlike Old Testament times, odds were stacked against them in such an impossible way that the outcome would seem completely hopeless and utter defeat inevitable were it not for God. With division so deep within God's church in the Crescent City, it could have easily sunk to its death in the flood waters, but when God

appeared inevitable defeat became certain victory. Ordinary people began to accomplish extraordinary things. Miracles became common

place and hope was restored. God had not forgotten The City That Care Forgot.
