**Indonesian Notebook** Brian Russell Roberts 2016-03-11 While Richard Wright's account of the 1955 Bandung Conference has been key to shaping Afro-Asian historical narratives, Indonesian accounts of Wright and his conference attendance have been largely overlooked. Indonesian Notebook contains myriad documents by Indonesian writers, intellectuals, and reporters, as well as a newly recovered lecture by Wright, previously published only in Indonesian. Brian Russell Roberts and Keith Foulcher introduce and contextualize these documents with extensive background information and analysis, showcasing the heterogeneity of postcolonial modernity and underscoring the need to consider non-English language perspectives in transnational cultural exchanges. This collection of primary sources and scholarly histories is a crucial companion volume to Wright'sThe Color Curtain.

**Muskegowuck Athinuwick** Victor P. Lytwyn 2002-03-06 The original people of the Hudson Bay lowlands, often known as the Lowland Cree and known to themselves as Muskegowuck Athinuwick, were among the first Aboriginal peoples in northwestern North America to come into contact with Europeans. This book challenges long-held misconceptions about the Lowland Cree, and illustrates how historians have often misunderstood the role and resourcefulness of Aboriginal peoples during the fur-trade era. Although their own oral histories tell that the Lowland Cree have lived in the region for thousands of years, many historians have portrayed the Lowland Cree as relative newcomers who were dependent on the Hudson's Bay Company fur-traders by the 1700s. Historical geographer Victor Lytwyn shows instead that the Lowland Cree had a well-established traditional society that, far from being dependent on Europeans, was instrumental in the survival of traders throughout the network of HBC forts during the 18th and 19th centuries.

**International Wildlife Trade** Ginette Hemley 1994-10 For more than two decades, the Convention on International Trade in Endangered Species of Wild Fauna and Flora, known as CITES, has been one of the largest and most effective conservation agreements in the world. **Essayists on the Essay** Carl H. Klaus 2012-03-15 The first historically and internationally comprehensive collection of its kind, Essayists on the Essay is a path-breaking work that is nothing less than a richly varied sourcebook for anyone interested in the theory, practice, and art of the essay. This unique work includes a selection of fifty distinctive pieces by American, Canadian, English, European, and South American essayists from Montaigne to the present--many of which have not previously been anthologized or translated--as well as a detailed bibliographical and thematic guide to hundreds of additional works about the essay. From a buoyant introduction that provides a sweeping historical and analytic overview of essayists' thinking about their genre--a collective poetics of the essay--to the detailed headnotes offering pointed information about both the essayists themselves and the anthologized selections, to the richly detailed bibliographic sections, Essayists on the Essay is essential to anyone who cares about the form. This collection provides teachers, scholars, essayists, and readers with the materials they need to take a fresh look at this important but often overlooked form that has for too long been relegated to the role of service genre--used primarily to write about other more "literary" genres or to teach young people how to write. Here, in a single celebratory volume, are four centuries of commentary and theory reminding us of the essay's storied history, its international appeal, and its relationship not just with poetry and fiction but also with radio, film, video, and new media.

**The Music Instinct** Philip Ball 2010-09-02 From Bach fugues to Indonesian gamelan, from nursery rhymes to rock, music has cast its light into every corner of human culture. But why music excites such deep passions, and how we make sense of musical sound at all, are questions that have until recently remained unanswered. Now in *The Music Instinct*, award-winning writer Philip Ball provides the first comprehensive, accessible survey of what is known--and still unknown--about how music works its magic, and why, as much as eating and sleeping, it seems indispensable to humanity. Deftly weaving together the latest findings in brain science with history, mathematics, and philosophy, *The Music Instinct* not only deepens our appreciation of the music we love, but shows that we would not be ourselves without it. The Sunday Times hailed it as "a wonderful account of why music matters," with Ball's "passion for music evident on every page."

**Justice and security green paper** Great Britain: Ministry of Justice 2011-10-19 In safeguarding national security the Government produces and receives sensitive information. This information must be protected appropriately, as failure to do so may compromise investigations, endanger lives and ultimately lessen its ability to keep the country safe. The increased security and intelligence activity of recent years has led to greater scrutiny including in the civil courts, which have heard a growing numbers of cases challenging Government decisions and actions in the national security sphere. Such cases involve information that under current rules cannot be disclosed in a courtroom. The UK justice system is then either unable to pass judgment and cases collapse or are settled without a judge reaching any conclusions. This green paper aims to respond to the challenges of how sensitive information is treated in the full range of civil proceedings. It looks for solutions that improve the current arrangements while upholding the Government's commitment to the rule of law. It also addresses the need for public reassurance that the national security work is robustly scrutinised, and that the scrutinising bodies are credible and effective. The proposals in this consultation are in three broad areas: enhancing procedural fairness, safeguarding material and reform of intelligence oversight.

S. Carne-Ross 2010 D. S. Carne-Ross (1921-2010) was one of the finest critics of classical literature in English translation after Arnold. More than four decades of Carne-Ross's writings are represented in this volume, which includes criticism of both ancient and modern writers, in addition to historical-critical studies of translation, discriminating analyses of translators widely read today, and investigations in the relationship between translation, criticism, and literary creation. This book will appeal to a wide audience including classicists, specialists in reception and translation studies, students of comparative literature, and literary readers. Two chapters give readings of the *Odyssey* and the *Oresteia*; others focus on significant and influential translators of those works. Two long essays give extended accounts of two of the most widely read twentieth-century translators of Greek and Latin, Robert Fitzgerald and Richmond Lattimore; there are also incisive studies of translations by H.D., David Ferry, Christopher Logue and others. Some essays focus on a particular work, author, or genre in translation, for example, Pindar's *Pythian 12*, Horace, Greek tragedy, and Greek epigram. The first and the final chapters use translation as a point of departure in order to investigate questions about transfers between ancient and modern literatures. In all the essays, translated works are considered in their relation to Greek or Roman literature and also as contributions to English literature, as a source of innovation for it, or as a way of laying bare connections between past and present moments.

**The Postcolonial Gramsci** Neelam Srivastava 2012-07-26 The importance of Antonio Gramsci's work for postcolonial studies can hardly be exaggerated, and in this volume, contributors situate Gramsci's work in the vast and complex oeuvre of postcolonial studies. Specifically, this book endeavors to reassess the impact on postcolonial studies of the central role assigned by Gramsci to culture and literature in the formation of a truly revolutionary idea of the national--a notion that has profoundly shaped the thinking of both Frantz Fanon and Edward Said. Gramsci, as Iain Chambers has argued, has been instrumental in helping scholars rethink their understanding of historical, political, and cultural struggle by substituting the relationship between tradition and modernity with that of subaltern versus hegemonic parts of the world. Combining theoretical reflections and re-interpretations of Gramsci, the scholars in this collection present comparative geo-cultural perspectives on the meaning of the subaltern, passive revolution, hegemony, and the concept of national-popular culture in order to chart out a political map of the postcolonial through the central focus on Gramsci.
