5th International Munich Chassis Symposium 2014 Peter E. Pfeffer 2014-07-18 The key drivers of innovation in the field of chassis systems are measures to improve vehicle dynamics and driving safety, efforts to reduce fuel consumption, and intelligent development methods. In addition, chassis development is focusing on enhancing ride comfort while also improving NVH characteristics. At the same time, modularization strategies, concepts for the electrification of the powertrain, and steps towards greater system connectivity are making increasingly complex demands on the chassis and its development. Developers are being called upon to respond to these challenges with a variety of solutions.

Number 96, Mavis Bramston and Me David Sale 2013 Two shows changed the face of Australian television forever, and rocked the nation to its foundations. And now, the creator of Number 96 and the Executive Producer of The Mavis Bramston Show takes you behind the scenes of these two controversial, outrageously groundbreaking series for a jaunt through the industry's Golden Years. These two shows flaunted the unmentionable, destroyed taboos, ridiculed sacred cows and dared to deal with subjects hitherto considered too shocking for polite society. They were condemned from the pulpit, slayed by the critics, yet adored by an immense majority of viewers. Actor, script writer, producer and author David Sale's career progressed through the theatres and movie studios of London and Hollywood and the turbulent world of Australia's TV industry, and he takes us with him every step of the way. It's a life that began in war-ravaged Manchester, followed the migrant route to Australia, and – against all odds – hit the heights of show business. It can be summed up in four words. From Blitz to Glitz! "I held her firmly at arm's length and told her not to forget to leave her breakfast order outside the door. All around us, whispers of debauchery filtered from elsewhere in the hotel. She turned her face up at me, with an innocence that belied her words, blinked at me, the tears still visible on her cheeks. 'I'm serious, you know. I want to be a star. And I'll do anything, f*ck anyone, to get there. I know you will, I said. And eventually, she did."

6th International Munich Chassis Symposium 2015 Peter Pfeffer 2015-06-18 Connectivity has arrived in the vehicle - whether it is in-car internet or car-to-car communication. For the chassis too, the connected car is increasingly becoming a driver of innovation. Predictive and intelligent chassis systems and automated driving are just some of the

topics being addressed. In addition to enhancing driving comfort and safety, interconnecting the powertrain with the chassis can also provide new functions, not only in cars but also in commercial vehicles. What is more, modularization, electrification of the powertrain, intelligent development methods and efforts to reduce fuel consumption are also driving innovations in chassis systems.

BMW M5 James Taylor 2015-10-26 BMW's M5 was a simple concept: a production 5 Series saloon re-developed for high performance by the Motorsport division. The M5 was the car that really initiated the legend of the M-cars from BMW; the letter M had been applied to a high-performance BMW as early as 1978, but that year's M1 was an exotic supercar. It had the right image, but the M1 was never going to bring in major profits. The M5 was much simpler in concept. It was and remains a production 5 Series saloon, redeveloped for ultra-high performance. Manufacturing costs were minimized, allowing BMW to price the car more attractively and still bring in healthy profits. This new book charts the development of the M5 across five generations. For all fans of the BMW M5, this book provides essential background, and is packed with the facts and details that make the M5 legend come alive. The M5 is still in production and remains the benchmark high-performance saloon wherever it is sold. This is essential background reading for all BMW M5 fans and motoring enthusiasts and is superbly illustrated with 211 colour photographs.

In the Pond Ha Jin 2014-10-29 National Book Award-winner Ha Jin's arresting debut novel, *In the Pond*, is a darkly funny portrait of an amateur calligrapher who wields his delicate artist's brush as a weapon against the powerful party bureaucrats who rule his provincial Chinese town. Shao Bin is a downtrodden worker at the Harvest Fertilizer Plant by day and an aspiring artist by night. Passed over on the list to receive a decent apartment for his young family, while those in favor with the party's leaders are selected ahead of him, Shao Bin chafes at his powerlessness. When he attempts to expose his corrupt superiors by circulating satirical cartoons, he provokes an escalating series of merciless counterattacks that send ripples beyond his small community. Artfully crafted and suffused with earthy wit, *In the Pond* is a moving tale about humble lives caught up in larger social forces.
